## Amendment to the Agreement Between Dialtone & More, Inc. and

BellSouth Telecommunications, Inc. d/b/a AT&T Alabama, AT&T Florida, AT&T Georgia, AT&T Kentucky, AT&T Louisiana, AT&T Mississippi, AT&T North Carolina, AT&T South Carolina and AT&T Tennessee Dated May 23, 2007

Pursuant to this Amendment, (the "Amendment"), Dialtone & More, Inc. (DTM), and BellSouth Telecommunications, Inc. d/b/a AT&T Alabama, AT&T Florida, AT&T Georgia, AT&T Kentucky, AT&T Louisiana, AT&T Mississippi, AT&T North Carolina, AT&T South Carolina and AT&T Tennessee ("AT&T"), hereinafter referred to collectively as the "Parties," hereby agree to amend that certain Interconnection Agreement between the Parties dated May 23, 2007 (Agreement) to be effective thirty (30) calendar days after the date of the last signature executing the Amendment (Effective Date).

WHEREAS, AT&T and DTM entered into the Agreement on May 23, 2007, and;

NOW THEREFORE, in consideration of the mutual provisions contained herein and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby covenant and agree as follows:

1. The Parties agree to replace the initial Section in the General Terms and Conditions with the following language:

**THIS AGREEMENT** is made by and between BellSouth Telecommunications, Inc. d/b/a AT&T Alabama, AT&T Florida, AT&T Georgia, AT&T Kentucky, AT&T Louisiana, AT&T Mississippi, AT&T North Carolina, AT&T South Carolina and AT&T Tennessee, (AT&T), Dialtone & More, Inc. (DTM), a Georgia corporation, and shall be effective on the Effective Date, as defined herein. This Agreement may refer to either AT&T or DTM or both as a "Party" or "Parties."

- 2. Any reference to BellSouth in the Agreement shall be deemed to mean AT&T as described in Section 1 above.
- 3. The Parties agree to delete the second Whereas clause in the General Terms and Conditions and replace with the following:

**WHEREAS**, DTM is or seeks to become a CLEC authorized to provide telecommunications services in the states of Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, and Tennessee.

4. The Parties agree to add the Attachment 1, Resale Discounts & Rates, Attachment 2, Network Elements and Other Services Rates, and Attachment 3, Network Interconnection Rates for the states of Alabama, Florida, Kentucky, Louisiana,

Mississippi, North Carolina, and Tennessee as Exhibit 1 attached hereto and by reference incorporated into this Amendment.

- 5. The Parties agree to delete the rates, terms and conditions for Attachment 4, Collocation, in their entirety and replace with the rates, terms and conditions for Attachment 4, Collocation reflected as Exhibit 2, attached hereto and by reference incorporated into this Amendment.
- 6. All of the other provisions of the Agreement, dated May 23, 2007, shall remain in full force and effect.
- 7. Either or both of the Parties are authorized to submit this Amendment to the respective state regulatory authorities for approval subject to Section 252(e) of the Federal Telecommunications Act of 1996.
- 8. In entering into this Amendment, neither Party waives, and each Party expressly reserves, any rights, remedies or arguments it may have at law or under the intervening law or regulatory change provisions in the underlying Agreement (including intervening law rights asserted by either Party via written notice predating this Amendment) with respect to any orders, decisions, legislation or proceedings and any remands thereof, which the Parties have not yet fully incorporated into this Agreement or which may be the subject of further review.

Signature Page

IN WITNESS WHEREOF, the Parties have executed this Amendment the day and year written below.

BellSouth Telecommunications, Inc. d/b/a AT&T Alabama, AT&T Florida, AT&T Georgia, AT&T Kentucky, AT&T Louisiana, AT&T Mississippi, AT&T North Carolina, AT&T South Carolina and AT&T Tennessee

#### AT&T COLLOCATION

## 1. Scope of Attachment

#### 1.1 AT&T Premises

- 1.1.1 The rates, terms and conditions contained within this Attachment shall only apply when DTM is physically collocated as a sole occupant or as a Host within an AT&T Premises pursuant to this Attachment. AT&T Premises, as defined in this Attachment includes AT&T Central Offices, and Remote Terminals (hereinafter "AT&T Premises"). This Attachment is applicable to AT&T Premises owned or leased by AT&T. Where not specified, the language in this Attachment applies to both Central Office and Remote Site Collocation.
- 1.1.2 Third Party Property. If the AT&T Premises, or the property on which it is located, is leased by AT&T from a third party or otherwise controlled by a third party, special considerations and intervals may apply in addition to the terms and conditions of this Attachment. Additionally, where AT&T notifies DTM that AT&T's agreement with a third party does not grant AT&T the ability to provide access and use rights to others, upon DTM's request, AT&T will use commercially reasonable efforts to obtain the owner's consent and to otherwise secure such rights for DTM. DTM agrees to reimburse AT&T for all costs incurred by AT&T in obtaining such rights for DTM. In cases where a third party agreement does not grant AT&T the right to provide access and use rights to others as contemplated by this Attachment and AT&T, is unable to secure such access and use rights for DTM, DTM shall be responsible for obtaining such permission to access and use such property. AT&T shall cooperate with DTM in obtaining such permission.

## 1.2 Right to Occupy

- 1.2.1 AT&T shall offer to DTM collocation on rates, terms and conditions that are just, reasonable, nondiscriminatory and consistent with the rules of the FCC. Subject to the rates, terms and conditions of this Attachment, where space is available and it is technically feasible, AT&T will allow DTM to occupy a certain area designated by AT&T within an AT&T Premises, or on AT&T property upon which the AT&T Premises is located, of a size which is specified by DTM and agreed to by AT&T (hereinafter "Collocation Space"). Except as otherwise specified, any references to Collocation Space shall be for physical collocation. The necessary rates, terms and conditions for a premises as defined by the FCC, other than AT&T Premises, shall be negotiated upon reasonable request for collocation at such premises.
- 1.2.2 Neither AT&T nor any of AT&T's affiliates may reserve space for future use on more preferential terms than those set forth in this Attachment.
- 1.2.2.1 In all states other than Florida, the size specified by DTM may contemplate a request for space sufficient to accommodate DTM's growth within a twenty-four (24) month period.

Version: 2Q07 Standard ICA

- 1.2.2.2 In the state of Florida, the size specified by DTM may contemplate a request for space sufficient to accommodate DTM's growth within an eighteen (18) month period.
- Space Allocation. AT&T shall assign DTM Collocation Space that utilizes 1.3 existing infrastructure (e.g., heating, ventilation, air conditioning (HVAC), lighting and available power), if such space is available for collocation. Otherwise, AT&T shall attempt to accommodate DTM's requested space preferences, if any, including the provision of contiguous space for any subsequent request for collocation. In allocating Collocation Space, AT&T shall not materially increase DTM's cost or materially delay DTM's occupation and use of the Collocation Space, assign Collocation Space that will impair the quality of service or otherwise limit the service DTM wishes to offer, reduce unreasonably the total space available for physical collocation or preclude reasonable physical collocation within the AT&T Premises. Space shall not be available for collocation if it is: (a) physically occupied by non-obsolete equipment; (b) assigned to another collocated telecommunications carrier; (c) used to provide physical access to occupied space; (d) used to enable technicians to work on equipment located within occupied space; (e) properly reserved for future use, either by AT&T or another collocated telecommunications carrier; or (f) essential for the administration and proper functioning of the AT&T Premises. AT&T may segregate Collocation Space and require separate entrances for collocated telecommunications carriers to access their Collocation Space, pursuant to FCC Rules.

#### 1.4 Transfer of Collocation Space

- 1.4.1 DTM shall be allowed to transfer Collocation Space to another CLEC under the following conditions: (1) the AT&T Premises is not at or near space exhaustion; (2) the transfer of space shall be contingent upon AT&T's approval, which will not be unreasonably withheld; (3) DTM has no unpaid, undisputed collocation charges; and (4) the transfer of the Collocation Space is in conjunction with DTM's sale of all or substantially all, of the in-place collocation equipment to the same CLEC.
- 1.4.2 The responsibilities of DTM shall include: (1) submitting a letter of authorization to AT&T for the transfer; (2) entering into a transfer agreement with AT&T and the acquiring CLEC; and (3) returning all Security Access Devices to AT&T. The responsibilities of the acquiring CLEC shall include: (1) submitting an application to AT&T for the transfer of the Collocation Space; (2) satisfying all requirements of its interconnection agreement with AT&T; (3) submitting a letter to AT&T for the assumption of services; and (4) entering into a transfer agreement with AT&T and DTM.
- 1.4.3 In conjunction with a transfer of Collocation Space, any services associated with the Collocation Space shall be transferred pursuant to separately negotiated rates, terms and conditions.

Version: 2Q07 Standard ICA

# 1.5 <u>Space Reclamation</u>

- 1.5.1 In the event of space exhaust within an AT&T Premises, AT&T may include in its documentation for the Petition for Waiver filed with the Commission, any unutilized space in the AT&T Premises. DTM will be responsible for the justification of unutilized space within its Collocation Space, if the Commission requires such justification.
- 1.5.2 AT&T may reclaim unused Collocation Space when an AT&T Premises is at, or near, space exhaustion and DTM cannot demonstrate that DTM will utilize the Collocation Space in the time frames set forth below in Section 1.5.3. In the event of space exhaust or near exhaust within an AT&T Premises, AT&T will provide written notice to DTM requesting that DTM release non-utilized Collocation Space to AT&T, when one hundred percent (100%) of the Collocation Space in DTM's collocation arrangement is not being utilized.
- 1.5.3 Within twenty (20) days of receipt of written notification from AT&T, DTM shall either: (1) return the non-utilized Collocation Space to AT&T in which case DTM shall be relieved of all obligations for charges associated with that portion of the Collocation Space applicable from the date the Collocation Space is returned to AT&T; or (2) for all states, with the exception of Florida, provide AT&T with information demonstrating that the Collocation Space will be utilized within twenty-four (24) months from the date DTM accepted the Collocation Space (Acceptance Date) from AT&T. For Florida, DTM shall provide information to AT&T demonstrating that the Collocation Space will be utilized within eighteen (18) months from the Acceptance Date.
- 1.5.4 Disputes concerning AT&T's claim of space exhaust, or near exhaust, or DTM's refusal to return requested Collocation Space should be resolved by AT&T and DTM pursuant to the dispute resolution language contained in the General Terms and Conditions.
- 1.6 <u>Use of Space.</u> DTM may only place in the Collocation Space equipment necessary for interconnection with AT&T's services/facilities or for accessing AT&T's unbundled network elements for the provision of Telecommunications Services, as specifically set forth in this Agreement. The Collocation Space assigned to DTM may not be used for any purposes other than as specifically described herein, including, but not limited to office space or a place of reporting for DTM's employees or certified suppliers.
- 1.7 <u>Rates and Charges.</u> DTM agrees to pay the rates and charges identified in Exhibit B.
- 1.8 <u>Due Dates.</u> If any due date contained in this Attachment falls on a weekend or a national holiday, then the due date will be the next business day thereafter. For intervals of ten (10) days or less, national holidays will be excluded. For purposes of this Attachment, national holidays include the following: New Year's Day,

Version: 2Q07 Standard ICA

Martin Luther King, Jr. Day, President's Day (Washington's Birthday), Memorial Day, Independence Day, Labor Day, Columbus Day, Veteran's Day, Thanksgiving Day and Christmas Day.

1.9 <u>Compliance.</u> Subject to Section 24 of the General Terms and Conditions of this Agreement, the Parties agree to comply with all applicable federal, state, county, local and administrative laws, rules, ordinances, regulations and codes in the performance of their obligations hereunder.

# **2** Optional Reports

- 2.1 Space Availability Report. Upon request from DTM and at DTM's expense, AT&T will provide a written report (Space Availability Report) describing in detail the space that is currently available for collocation at a particular AT&T Premises. This report will include the amount of Collocation Space available at the AT&T Premises requested, the number of collocators present at the AT&T Premises, any modifications in the use of the space since the last report on the AT&T Premises requested and the measures AT&T is taking to make additional space available for collocation arrangements. A Space Availability Report does not reserve space at the AT&T Premises for which the Space Availability Report was requested by DTM.
- 2.1.1 The request from DTM for a Space Availability Report must be in writing and include the AT&T Premises street address, as identified in the LERG, and the CLLI code for the AT&T Premises requested. CLLI code information is located in the NECA Tariff FCC No. 4.
- 2.1.2 AT&T will respond to a request for a Space Availability Report for a particular AT&T Premises within ten (10) days of the receipt of such request.
- AT&T will use commercially reasonable efforts to respond in ten (10) days to a Space Availability Report request when the request includes from two (2) to five (5) AT&T Premises within the same state. The response time for Space Availability Report requests of more than five (5) AT&T Premises, whether the request is for the same state or for two (2) or more states within the AT&T Southeast Region 9-State, shall be negotiated between the Parties.
- Remote Terminal Information. Upon request, AT&T will provide DTM with the following information concerning AT&T's remote terminals: (i) the address of the remote terminal; (ii) the CLLI code of the remote terminal; (iii) the carrier serving area of the remote terminal; (iv) the designation of which remote terminals subtend a particular central office; and (v) the number and address of customers that are served by a particular remote terminal.
- 2.2.1 AT&T will provide this information within thirty (30) days of a DTM request subject to the following conditions: (i) the information will only be provided on a CD in the same format in which it appears in AT&T's systems; and (ii) the information will only be provided for each serving wire center designated by DTM, up to a maximum of thirty (30) wire centers per DTM request per month

Version: 2Q07 Standard ICA

per state. AT&T will bill the nonrecurring charge pursuant to the rates in Exhibit B at the time AT&T sends the CD.

# **3 Collocation Options**

3.1 Cageless Collocation. AT&T shall allow DTM to collocate DTM's equipment and facilities without requiring the construction of a cage or similar structure. AT&T shall allow DTM to have direct access to DTM's equipment and facilities in accordance with Section 5.1.2 below. AT&T shall make cageless collocation available in single bay increments. Except where DTM's equipment requires special technical considerations (e.g., special cable racking or isolated ground plane), AT&T shall assign cageless Collocation Space in conventional equipment rack lineups where feasible. For equipment requiring special technical considerations, DTM must provide the equipment layout, including spatial dimensions for such equipment pursuant to generic requirements contained in Telcordia GR-63-Core, and shall be responsible for compliance with all special technical requirements associated with such equipment.

## 3.2 <u>Caged Collocation</u>

- 3.2.1 AT&T will make caged Collocation Space in Central Offices available in fifty (50) square foot increments. At DTM's option and expense, DTM will arrange with a Supplier certified by AT&T (AT&T Certified Supplier) to construct a collocation arrangement enclosure in accordance with AT&T's specifications for a wire mesh enclosure prior to starting equipment installation. Where local building codes require enclosure specifications more stringent than AT&T's wire mesh enclosure specifications, DTM and DTM's AT&T Certified Supplier must comply with the more stringent local building code requirements. DTM's AT&T Certified Supplier shall be responsible for filing and obtaining any and all necessary permits and/or licenses for such construction. AT&T or AT&T's designated agent or contractor shall provide, at DTM's expense, documentation, which may include existing building architectural drawings, enclosure drawings, specifications, etc., necessary for DTM's AT&T Certified Supplier to obtain all necessary permits and/or other licenses. DTM's AT&T Certified Supplier shall bill DTM directly for all work performed for DTM. AT&T shall have no liability for, nor responsibility to pay, such charges imposed by DTM's AT&T Certified Supplier. DTM must provide the local AT&T Central Office Building Contact with two (2) Access Keys that will allow entry into the locked enclosure. Except in the case of an emergency, AT&T will not access DTM's locked enclosure prior to notifying DTM at least forty-eight (48) hours or two (2) business days, whichever is greater, before access to DTM's Collocation Space is required. Upon request, AT&T shall construct the enclosure for DTM.
- 3.2.2 In the event DTM's AT&T Certified Supplier will construct the collocation arrangement enclosure, AT&T may elect to review DTM's plans and specifications, prior to allowing the construction to start, to ensure compliance with AT&T's wire mesh enclosure specifications. AT&T will notify DTM of its

Version: 2Q07 Standard ICA

desire to conduct this review in AT&T's Application Response, as defined herein, to DTM's Initial Application. If DTM's Initial Application does not indicate its desire to construct its own enclosure and DTM subsequently decides to construct its own enclosure prior to AT&T's Application Response, then DTM will resubmit its Initial Application, indicating its desire to construct its own enclosure. If DTM subsequently decides construct its own enclosure after the bona fide firm order (hereinafter "BFFO") has been accepted by AT&T, DTM will submit a Subsequent Application, as defined in Section 6.2 below. If AT&T elects to review DTM's plans and specifications, then AT&T will provide notification to DTM within ten (10) days after the Initial Application BFFO date or, if a Subsequent Application is submitted as set forth in the preceding sentence, then the Subsequent Application BFFO date. AT&T shall complete its review within fifteen (15) days after AT&T's receipt of DTM's plans and specifications. Regardless of whether or not AT&T elects to review DTM's plans and specifications, AT&T reserves the right to inspect the enclosure after construction has been completed to ensure that it is constructed according to DTM's submitted plans and specifications and/or AT&T's wire mesh enclosure specifications, as applicable. If AT&T decides to inspect the constructed Collocation Space, AT&T will complete its inspection within fifteen (15) days after receipt of DTM's written notification that the enclosure has been completed. Within seven (7) days after AT&T has completed its inspection of DTM's caged Collocation Space, AT&T shall require DTM, at DTM's expense, to remove or correct any structure that does not meet DTM's plans and specifications or AT&T's wire mesh enclosure specifications, as applicable.

## 3.3 <u>Shared Caged Collocation</u>

- 3.3.1 DTM may allow other telecommunications carriers to share DTM's caged Collocation Space, pursuant to the terms and conditions agreed to by DTM (Host) and the other telecommunications carriers (Guests) contained in this Section, except where the AT&T Premises is located within a leased space and AT&T is prohibited by said lease from offering such an option to DTM. AT&T shall be notified in writing by DTM upon the execution of any agreement between the Host and its Guest(s) prior to the submission of an application. Further, such notification shall include the name of the Guest(s), the term of the agreement, and a certification by DTM that said agreement imposes upon the Guest(s) the same terms and conditions for Collocation Space as set forth in this Attachment between AT&T and DTM. The term of the agreement between the Host and its Guest(s) shall not exceed the term of this Agreement between AT&T and DTM.
- DTM, as the Host, shall be the sole interface and responsible Party to AT&T for the assessment and billing of rates and charges contained within this Attachment and for the purposes of ensuring that the safety and security requirements of this Attachment are fully complied with by the Guest(s), its employees and agents. AT&T shall provide DTM with a pro-ration of the costs of the Collocation Space based on the number of collocators and the space used by each. There will be a

Version: 2Q07 Standard ICA

minimum charge of one (1) bay/rack per Host/Guest. In addition to the above, for all states other than Florida, DTM shall be the responsible Party to AT&T for the purpose of submitting applications for initial and additional equipment placement for the Guest(s). In Florida, the Guest(s) may submit its own Initial Application and Subsequent Applications for equipment placement using the Host's ACNA. A separate Guest application shall result in the assessment of an Initial Application Fee or a Subsequent Application Fee, as set forth in Exhibit B, which will be billed to the Host on the date that AT&T provides its written Application Response to the Guest(s) Bona Fide application.

- 3.3.3 Notwithstanding the foregoing, the Guest(s) may submit service orders directly to AT&T to request the provisioning of interconnecting facilities between AT&T and the Guest(s), the provisioning of services, and/or access to Network Elements. The bill for these interconnecting facilities, services and Network Elements will be charged to the Guest(s) pursuant to the applicable AT&T Tariff or the Guest's Interconnection Agreement with AT&T.
- 3.3.4 DTM shall indemnify and hold harmless AT&T from any and all claims, actions, causes of action, of whatever kind or nature arising out of the presence of DTM's Guest(s) in the Collocation Space, except to the extent caused by AT&T's sole negligence, gross negligence, or willful misconduct.

#### 3.4 Adjacent Collocation

- 3.4.1 Subject to technical feasibility and space availability, AT&T will permit an adjacent collocation arrangement (Adjacent Arrangement) on AT&T Premises' property only when space within the requested AT&T Premises is legitimately exhausted and where the Adjacent Arrangement does not interfere with access to existing or planned structures or facilities on the AT&T Premises' property. An Adjacent Arrangement shall be constructed or procured by DTM or DTM's AT&T Certified Supplier and must be in conformance with the provisions of AT&T's design and construction specifications. Further, DTM shall construct, procure, maintain and operate said Adjacent Arrangement pursuant to all of the applicable rates, terms and conditions set forth in this Attachment.
- 3.4.2 If DTM requests Adjacent Collocation, pursuant to the conditions stated in Section 3.4 above, DTM must arrange with an AT&T Certified Supplier to construct or procure the Adjacent Arrangement structure in accordance with AT&T's specifications. AT&T will provide the appropriate specifications upon request. Where local building codes require specifications more stringent than AT&T's own specifications, DTM and DTM's AT&T Certified Supplier shall comply with the more stringent local building code requirements. DTM's AT&T Certified Supplier shall be responsible for filing and obtaining any and all necessary zoning, permits and/or licenses for such construction. DTM's AT&T Certified Supplier shall bill DTM directly for all work performed for DTM to comply with this Attachment. AT&T shall have no liability for, nor responsibility to pay such charges imposed by DTM's AT&T Certified Supplier. DTM must

Version: 2Q07 Standard ICA

provide the local AT&T contact with two (2) cards, keys or other access devices used to gain entry into the locked enclosure. Except in the case of an emergency, AT&T will not access DTM's locked enclosure prior to notifying DTM at least forty-eight (48) hours or two (2) business days, whichever is greater, before access to the Collocation Space is required.

- 3.4.3 DTM must submit its Adjacent Arrangement construction plans and specifications to AT&T when it places its Firm Order. AT&T shall review DTM's plans and specifications prior to the construction of an Adjacent Arrangement to ensure DTM's compliance with AT&T's specifications. AT&T shall complete its review within fifteen (15) days after receipt of the plans and specifications from DTM for the Adjacent Arrangement. AT&T may inspect the Adjacent Arrangement during and after construction is completed to ensure that it is constructed according to DTM's submitted plans and specifications. If AT&T decides to inspect the completed Adjacent Arrangement, AT&T will complete its inspection within fifteen (15) days after receipt of DTM's written notification that the Adjacent Arrangement has been completed. Within seven (7) days after AT&T has completed its inspection of DTM's Adjacent Arrangement, AT&T shall require DTM, at DTM's expense, to remove or correct any structure that does not meet its submitted plans and specifications or AT&T's specifications, as applicable.
- 3.4.4 DTM shall provide a concrete pad, the structure housing the Adjacent Arrangement, HVAC, lighting and all of the facilities that are required to connect the structure (i.e., racking, conduits, etc.) to the AT&T point of demarcation. At DTM's option and where the local authority having jurisdiction permits, AT&T shall provide an AC power source and access to physical Collocation services and facilities, subject to the same nondiscriminatory requirements as those applicable to any other physical Collocation arrangement. In Alabama and Louisiana, at DTM's request and expense, AT&T will provide Direct Current (DC) power to an Adjacent Collocation site where technically feasible, as that term has been defined by the FCC, and in accordance with applicable law. AT&T will provide DC power in an Adjacent Arrangement provided that such provisioning can be done in compliance with the National Electric Code (NEC), all safety and building codes and any local codes, such as, but not limited to, local zoning codes, and upon completion of negotiations between the Parties on the applicable rates and provisioning intervals. DTM will pay for any and all DC power construction and provisioning costs to an Adjacent Arrangement through individual case basis (ICB) pricing that must be paid as follows: fifty percent (50%) before the DC installation work begins and fifty percent (50%) at completion of the DC installation work to the Adjacent Arrangement. DTM's AT&T Certified Supplier shall be responsible, at DTM's sole expense, for filing the required documentation to obtain any and all necessary permits and/or licenses for an Adjacent Arrangement. AT&T shall allow Shared Caged Collocation within an Adjacent Arrangement, pursuant to the terms and conditions set forth in Section 3.3 above.

Version: 2Q07 Standard ICA

## 3.5 <u>Direct Connect</u>

- 3.5.1 AT&T will permit DTM to directly interconnect between its own physical/virtual Collocation Spaces within the same AT&T Premises (Direct Connect). DTM shall contract with an AT&T Certified Supplier to place the Direct Connect, which shall be provisioned using facilities owned by DTM. A Direct Connect shall utilize AT&T common cable support structure. There will be a recurring charge per linear foot, per cable, of the actual common cable support structure used by DTM to provision the Direct Connect between its physical/virtual Collocation Spaces. In those instances where DTM's physical/virtual Collocation Spaces are contiguous in the central office, DTM will have the option of using DTM's own technicians to deploy the Direct Connect using either electrical or optical facilities between its Collocation Spaces by constructing its own dedicated cable support structure. DTM will deploy such electrical or optical connections directly between its own equipment without being routed through AT&T's equipment or common cable support structure. DTM may not self-provision a Direct Connect on any AT&T distribution frame, Point of Termination (POT) Bay, Digital System Cross-Connect (DSX) panel or Light Guide Cross-Connect (LGX) panel. DTM is solely responsible for ensuring the integrity of the signal.
- 3.5.2 To place an order for a Direct Connect, DTM must submit an Initial Application or Subsequent Application to AT&T. If no modification to the Collocation Space is requested other than the placement of a Direct Connect, the Co-Carrier Cross Connect/Direct Connect Application Fee for Direct Connect, as defined in Exhibit B, will apply. If other modifications are requested, in addition to the placement of a Direct Connect, either an Initial Application Fee or a Subsequent Application Fee will apply, pursuant to Section 6.2 below. AT&T will bill this nonrecurring charge on the date that AT&T provides an Application Response to DTM.

#### 3.6 Co-Carrier Cross Connect (CCXC)

- 3.6.1 A CCXC is a cross connection between DTM and another collocated telecommunications carrier, other than AT&T, in the same AT&T Premises. Where technically feasible, AT&T will permit DTM to interconnect between its Collocation Space(s) and the physical/virtual collocation space(s) of another collocated telecommunications carrier(s) within the same AT&T Premises via a CCXC, pursuant to the FCC's Rules. The other collocated telecommunications carrier's agreement must also contain CCXC rates, terms and conditions before AT&T will permit the provisioning of a CCXC between the two (2) collocated carriers. The applicable AT&T charges will be assessed to DTM upon DTM's request for the CCXC. DTM is prohibited from using the Collocation Space for the sole or primary purpose of cross-connecting to other collocated telecommunications carriers.
- 3.6.2 DTM must contract with an AT&T Certified Supplier to place the CCXC. The CCXC shall be provisioned using facilities owned by DTM. Such cross-connections to other collocated telecommunications carriers may be made using

Version: 2Q07 Standard ICA

either electrical or optical facilities. DTM shall be responsible for providing a LOA, with the application, to AT&T from the other collocated telecommunications carrier to which it will be cross-connecting. The CCXC shall utilize AT&T common cable support structure. There will be a recurring charge per linear foot, per cable, of the common cable support structure used by DTM to provision the CCXC to the other collocated telecommunications carrier. In those instances where DTM's equipment and the equipment of the other collocated telecommunications carrier are located in contiguous caged Collocation Space, DTM may use its own technicians to install the CCXC using either electrical or optical facilities between the equipment of both collocated telecommunications carriers by constructing a dedicated cable support structure between the two (2) contiguous cages. DTM shall deploy such electrical or optical cross-connections directly between its own equipment and the equipment of the other collocated telecommunications carrier without being routed through AT&T's equipment or, in the case of a CCXC provisioned between contiguous collocation spaces, common cable support structure. DTM shall not provision CCXC on any AT&T distribution frame, POT Bay, DSX panel or LGX panel. DTM is solely responsible for ensuring the integrity of the signal.

3.6.3 To place an order for a CCXC, DTM must submit an application to AT&T. If no modification to the Collocation Space is requested other than the placement of a CCXC, the Co-Carrier Cross Connect/Direct Connect Application Fee for a CCXC, as defined in Exhibit B, will apply. If other modifications are requested, in addition to the placement of a CCXC, either an Initial Application or a Subsequent Application Fee will apply, pursuant to Section 6.2 below. AT&T will bill this nonrecurring charge on the date that it provides an Application Response to DTM.

# 4 Occupancy

- 4.1 <u>Space Ready Notification.</u> AT&T will notify DTM in writing when the Collocation Space is ready for occupancy (Space Ready Date).
- 4.2 Acceptance Walkthrough. DTM will schedule and complete an acceptance walkthrough of new or additional provisioned Collocation Space with AT&T within fifteen (15) days after the Space Ready Date. AT&T will correct any identified deviations from DTM's original or jointly amended application within seven (7) days after the walkthrough, unless the Parties mutually agree upon a different time frame. AT&T will then establish a new Space Ready Date. Another acceptance walkthrough will be scheduled and conducted within fifteen (15) days after the new Space Ready Date. This follow-up acceptance walkthrough will be limited to only those deviations identified in the initial walkthrough. If DTM completes its acceptance walkthrough within the fifteen (15) day interval associated with the applicable Space Ready Date, billing will begin upon the date of DTM's acceptance of the Collocation Space (Space Acceptance Date). In the event DTM fails to complete an acceptance walkthrough within the fifteen (15) day interval associated with the applicable

Version: 2Q07 Standard ICA

Space Ready Date, the Collocation Space shall be deemed accepted by DTM on the Space Ready Date and billing will commence from that date.

- 4.3 <u>Early Space Acceptance.</u> If DTM decides to occupy the Collocation Space prior to the Space Ready Date, the date DTM executes the Agreement for Customer Access and Acceptance to Unfinished Collocation Space is the date that will be deemed the Space Acceptance Date and billing will begin from that date.
- 4.4 <u>Equipment Installation.</u> DTM shall notify AT&T in writing that its collocation equipment installation is complete. DTM's collocation equipment installation is complete when DTM's equipment is connected to AT&T's network for the purpose of provisioning Telecommunication Services to DTM's customers. AT&T may refuse to accept any orders for cross-connects until it has received such notice from DTM.
- 4.5 <u>Termination of Occupancy.</u>
- 4.5.1 In addition to any other provisions addressing termination of occupancy in this Agreement, DTM may terminate its occupancy of a particular Collocation Space by submitting a Subsequent Application requesting termination of occupancy for such Collocation Space. Such termination shall be effective upon AT&T's acceptance of the Space Relinquishment Form. Billing for monthly recurring charges will cease on the date that DTM and AT&T conduct an inspection of the terminated space and jointly sign off on the Space Relinquishment Form or on the date that DTM signs off on the Space Relinquishment Form and sends this form to AT&T, provided no discrepancies are found during AT&T's subsequent inspection of the terminated space. If the subsequent inspection by AT&T reveals any discrepancies, billing will cease on the date that AT&T and DTM jointly conduct an inspection, confirming that DTM has corrected all of the noted discrepancies identified by AT&T. A Subsequent Application Fee will not apply for the termination of occupancy; however, specific disconnect fees may apply to the services terminating to such Collocation Space. The particular disconnect fees that would apply in each state are contained in Exhibit B.
- 4.5.2 Upon termination of occupancy, DTM, at its sole expense, shall remove its equipment and any other property owned, leased or controlled by DTM from the Collocation Space. DTM shall have thirty (30) days from the Bona Fide Firm Order (BFFO) date (Termination Date) to complete such removal, including the removal of all equipment and facilities of DTM's Guest(s), unless DTM's Guest(s) has assumed responsibility for the Collocation Space housing the Guest(s)'s equipment and executed the appropriate documentation required by AT&T to transfer the Collocation Space to the Guest(s) prior to DTM's Termination Date.
- 4.5.3 DTM shall continue the payment of all monthly recurring charges to AT&T until the date DTM, and if applicable DTM's Guest(s), has fully vacated the Collocation Space and the Space Relinquishment Form has been accepted by AT&T. If DTM or DTM's Guest(s) fails to vacate the Collocation Space within

Version: 2Q07 Standard ICA

thirty (30) days from the Termination Date, AT&T shall have the right to remove and dispose of the equipment and any other property of DTM or DTM's Guest(s), in any manner that AT&T deems fit, at DTM's expense and with no liability whatsoever for DTM's property or DTM's Guest(s) property.

4.5.4 Upon termination of DTM's right to occupy specific Collocation Space, the Collocation Space will revert back to AT&T's central office space inventory. DTM shall surrender the Collocation Space to AT&T in the same condition as when it was first occupied by DTM, with the exception of ordinary wear and tear, unless otherwise agreed to by the Parties. DTM's AT&T Certified Supplier shall be responsible for updating and making any necessary changes to AT&T's records as required by AT&T specifications including, but not limited to, AT&T's Central Office Record Drawings and ERMA Records. DTM shall be responsible for the cost of removing any DTM constructed enclosure, as well as any supporting structures (e.g., racking, conduits, power cables, etc.), by the Termination Date and restoring the grounds to their original condition.

# 5 Use of Collocation Space

# 5.1 <u>Equipment Type</u>

- AT&T shall permit the collocation and use of any equipment necessary for interconnection to AT&T's network and/or access to AT&T's unbundled network elements in the provision of Telecommunications Services, as the term "necessary" is defined by FCC 47 C.F.R. § 51.323 (b). The primary purpose and function of any equipment collocated in an AT&T Premises must be for interconnection to AT&T's network or access to AT&T's unbundled network elements in the provision of Telecommunications Services. Equipment is necessary for interconnection if an inability to deploy that equipment would, as a practical, economical, or operational matter, preclude the requesting carrier from obtaining interconnection with AT&T at a level equal in quality to that which AT&T obtains within its own network or what AT&T provides to any affiliate, subsidiary, or other party.
- 5.1.2 Examples of equipment that would not be considered necessary include, but are not limited to: traditional circuit switching equipment, equipment used exclusively for call-related databases, computer servers used exclusively for providing information services, OSS equipment used to support collocated telecommunications carrier network operations, equipment that generates customer orders, manages trouble tickets or inventory, or stores customer records in centralized databases, etc. AT&T will determine upon receipt of an application if the requested equipment is necessary based on the criteria established by the FCC. Multifunctional equipment placed on an AT&T Premises must not place any greater relative burden on AT&T's property than comparable single-function equipment. AT&T reserves the right to allow the collocation of any equipment on a nondiscriminatory basis.

Version: 2Q07 Standard ICA

- 5.1.3 Such equipment must, at a minimum, meet the following Telcordia Network Equipment Building Systems (NEBS) General Equipment Requirements: for Central Offices Criteria Level 1 requirements as outlined in Telcordia Special Report SR-3580, Issue 1 and for Remote Sites Criteria Level 3 requirements as outlined in the Telcordia Special report SR-3580, Issue 1. Except where otherwise required by a Commission, AT&T shall comply with the applicable FCC rules relating to denial of collocation equipment based on DTM's failure to comply with this Section.
- 5.1.3.1 To the extent DTM wishes to place equipment in its collocation that does not meet the standards set forth in 5.1.3, DTM may request in writing, pursuant to the Notices section of the General Terms & Conditions, a waiver to such standards. AT&T may provide a waiver in its sole discretion.
- 5.1.4 At a Remote Site, all DTM equipment installation shall comply with AT&T TR 73503-11h, "Grounding Engineering Procedures". Metallic cable sheaths and metallic strength members of optical fiber cables as well as the metallic cable sheaths of all copper conductor cables shall be bonded to the designated grounding bus for the Remote Site Location. All copper conductor pairs, working and non-working, shall be equipped with a solid-state protector unit (over-voltage protection only), which has been listed by a nationally recognized testing laboratory.
- 5.2 Terminations. DTM shall not request more DS0, DS1, DS3 and/or optical terminations for a collocation arrangement than the total port or termination capacity of the equipment physically installed in the Collocation Space. The total capacity of the equipment collocated in the Collocation Space will include equipment contained in an application, as well as any equipment already placed in the Collocation Space. If full network termination capacity of the equipment being installed is not requested in the application submitted by DTM, additional network terminations for the installed equipment will require the submission of a Subsequent Application. In the event DTM submits an application for terminations that will exceed the total capacity of the collocated equipment, DTM will be informed of the discrepancy by AT&T and required to submit a revision to the application.
- Security Interest in Equipment. Commencing with the most current calendar quarter after the Effective Date of this Agreement, and thereafter with respect to each subsequent calendar quarter during the term of this Agreement, DTM will, no later than thirty (30) days after the close of such calendar quarter, provide a report to ICS Collocation Product Management, Room 34th Floor, 675 W. Peachtree Street, Atlanta, Georgia 30375, listing any equipment in the Collocation Space (i) that was added during the calendar quarter to which such report pertains, and (ii) for which there is a UCC-1 lien holder or to another entity that has a secured financial interest in such equipment (Secured Equipment). If no Secured Equipment has been installed within a given calendar quarter, no report shall be due hereunder in connection with such calendar quarter.

Version: 2Q07 Standard ICA

- No Marketing. DTM shall not use the Collocation Space for marketing purposes, nor shall it place any identifying signs or markings outside the Collocation Space or on the grounds of the AT&T Premises.
- Equipment Identification. DTM shall place a plaque or affix other identification (e.g., stenciling or labeling) to each piece of DTM's equipment, including the appropriate emergency contacts with their corresponding telephone numbers, in order for AT&T to properly identify DTM's equipment in the case of an emergency. For caged Collocation Space, such identification must be placed on a plaque affixed to the outside of the caged enclosure.
- 5.6 Entrance Facilities.
- 5.6.1 DTM may elect to place DTM-owned or DTM leased fiber entrance facilities into its Collocation Space. AT&T will designate the point of interconnection in close proximity to the AT&T Premises housing the Collocation Space, such as at an entrance manhole or a cable vault for Central Offices, which is physically accessible by both Parties. For Central Offices, DTM will provide and place fiber cable in the entrance manhole of sufficient length to be pulled through conduit and into the splice location. DTM will provide and install a sufficient length of fire retardant riser cable, to which AT&T will splice the entrance cable. The fire retardant riser cable will extend from the splice location to DTM's equipment in DTM's Collocation Space. In the event DTM utilizes a non-metallic, riser-type entrance facility, a splice will not be required. For Remote Terminals DTM will provide and place copper cable through conduit from the Remote Site Collocation Space to the feeder distribution interface. Such copper cable must be of sufficient length to reach the splice location for splicing by AT&T. DTM must contact AT&T for authorization and instruction prior to placing any entrance facility cable in an entrance manhole or cable vault. DTM is responsible for the maintenance of the entrance facilities. Nonrecurring charges for cable installation will be assessed on a per cable basis as set forth in Exhibit B upon receipt of DTM's BFFO. Recurring charges for the cable support structure will be billed at the rates set forth in Exhibit B.
- 5.6.2 <u>Central Office Microwave Transmission Facilities.</u> At DTM's request, AT&T will accommodate, where technically feasible and space is available, a microwave entrance facility, pursuant to separately negotiated rates, terms and conditions.
- 5.6.3 Central Office Copper and Coaxial Cable Entrance Facilities. In Florida and Georgia, AT&T shall permit DTM to use copper or coaxial cable entrance facilities, if approved by the Commission, but only in those rare instances where DTM demonstrates a necessity and entrance capacity is not at or near exhaust in a particular AT&T Premises in which DTM's Collocation Space is located. In Florida, DTM must have approval by the Commission before it submits a request for copper entrance facilities. Notwithstanding the foregoing, in the case of adjacent collocation, copper facilities may be used between the adjacent collocation arrangement and the central office demarcation point, unless AT&T

Version: 2Q07 Standard ICA

determines that limited space is available for the placement of these entrance facilities.

5.7 <u>Dual Entrance Facilities at a Central Office.</u> AT&T will provide at least two (2) interconnection points at each Central Office where at least two (2) such interconnection points are available and capacity exists. Upon receipt of a request by DTM for dual entrance facilities to its physical Collocation Space, AT&T shall provide DTM with information regarding AT&T's capacity to accommodate the requested dual entrance facilities. If conduit in the serving manhole(s) is available and is not reserved for another purpose or for utilization within twelve (12) months of the receipt of an application for collocation, AT&T will make the requested conduit space available for the installation of a second entrance facility to DTM's Collocation Space. The location of the serving manhole(s) will be determined at the sole discretion of AT&T. Where dual entrance facilities are not available due to a lack of capacity, AT&T will provide this information to DTM in the Application Response.

#### 5.8 Shared Use

- 5.8.1 DTM may utilize spare capacity on an existing telecommunications carrier's entrance facility for the purpose of obtaining an entrance facility to DTM's Collocation Space within the same AT&T Premises.
- AT&T shall allow the splice, as long as the fiber is non-working dark fiber. DTM must arrange with AT&T in accordance with AT&T's Special Construction Procedures, RL93-11-030BT, and provide a LOA from the other telecommunications carrier authorizing AT&T to perform the splice of the DTM-provided riser cable to the spare capacity on the other telecommunications carrier's entrance facility. If DTM desires to allow another telecommunications carrier to use its entrance facilities, the telecommunications carrier must arrange with AT&T in accordance with AT&T's Special Construction Procedures, RL93-11-030BT, and provide a LOA from DTM authorizing AT&T to perform the splice of the telecommunications carrier's provided riser cable to the spare capacity on DTM's entrance facility.

#### 5.9 Demarcation Point

- 5.9.1 In Tennessee, if DTM elects the Tennessee Regulatory Authority (TRA) rates as set forth in Exhibit C, the additional language also set forth in Exhibit C for Demarcation Point, will be effective in conjunction with the remaining terms and conditions of this Attachment.
- AT&T will designate the point(s) of demarcation between DTM's equipment and/or network facilities and AT&T's network facilities. For 2-wire and 4-wire connections, the demarcation point shall be a common block on the AT&T designated conventional distribution frame. DTM shall be responsible for providing the common block and cabling and DTM's AT&T Certified Supplier shall be responsible for installing and properly labeling/stenciling the common block and any necessary cabling identified in Section 7 below. For DS1, DS3,

Version: 2Q07 Standard ICA

STS1, and optical terminations, AT&T shall designate, provide, and install demarcation point hardware on a per arrangement basis. DTM shall be responsible for providing, and DTM's AT&T Certified Supplier shall be responsible for installing any necessary cabling and properly labeling/stenciling the demarcation point hardware for terminations identified in Section 7 below.

- 5.9.3 DTM or its agent must install, maintain and operate the equipment/facilities on its side of the demarcation point, pursuant to Section 5.10 below and may self-provision cross-connects that may be required within its own Collocation Space to activate service requests.
- Equipment and Facilities. DTM, or if required by this Attachment, DTM's AT&T Certified Supplier, is solely responsible for the design, engineering, installation, testing, provisioning, performance, monitoring and maintenance/repair of the equipment and network facilities used by DTM, which must be performed in compliance with all applicable AT&T specifications. Such equipment and network facilities may include, but are not limited to, cable(s), equipment, and POT connections. DTM and its designated AT&T Certified Supplier must follow and comply with all AT&T specifications outlined in the following AT&T Technical Requirements: TR 73503, TR 73519, TR 73572 and TR 73564.

## 5.11 AT&T's Access to Collocation Space

- 5.11.1 From time to time, AT&T may require access to DTM's Collocation Space. AT&T retains the right to access DTM's Collocation Space for the purpose of making AT&T equipment and building modifications (e.g., installing, altering or removing racking, ducts, electrical wiring, HVAC, and cabling). In such cases, AT&T will give notice to DTM at least forty-eight (48) hours before access to DTM's Collocation Space is required. DTM may elect to be present whenever AT&T performs work in the DTM's Collocation Space. The Parties agree that DTM will not bear any of the expense associated with this type of work.
- 5.11.2 In the case of an emergency, AT&T will provide oral notice of entry as soon as reasonably practicable after such entry.
- 5.11.3 DTM must provide the local AT&T Central Office Building Contact with two (2) Access Devices that will allow AT&T entry into any enclosed and locked Collocation Space including, but not limited to, an Adjacent Arrangement, pursuant to the requirements contained in this Section.

#### 5.12 DTM's Access

Pursuant to Section 12 below, DTM shall have access to its Collocation Space twenty-four (24) hours a day, seven (7) days a week. DTM agrees to provide the name, date of birth and either the social security number or driver's license number of each employee, supplier or agent of DTM or DTM's Guest(s) with DTM's written request for access keys or cards (Access Devices) for specific AT&T Premises, prior to the issuance of said Access Devices, using Form RF-

Version: 2Q07 Standard ICA

2906-C, the "CLEC and CLEC Certified Supplier Access Request and Acknowledgement" form. The appropriate key acknowledgement forms (the "Collocation Acknowledgement Sheet" for access cards and the "Key Acknowledgement Form" for keys) must be signed by DTM and returned to AT&T Access Management within fifteen (15) days of DTM's receipt of these forms. Failure to return these properly acknowledged forms will result in the subsequent access key or card requests being held by AT&T until the proper acknowledgement documents have been received by AT&T and reflect current information. Charges for Security Access System and for Security Access Devices will be billed at the rates set forth in Exhibit B. Access Devices may not be duplicated under any circumstances. DTM agrees to be responsible for all Access Devices and for the return of all Access Devices in the possession of DTM's employees, suppliers, agents or Guests after termination of the employment relationship, the contractual obligation with DTM ends, upon the termination of this Agreement, or upon the termination of occupancy of Collocation Space in a specific AT&T Premises. DTM shall pay all applicable charges associated with lost or stolen Access Devices.

- 5.12.2 DTM must submit to AT&T the completed Access Control Request Form for all employees, suppliers, agents or Guests requiring access to an AT&T Premises at least thirty (30) days prior to the date DTM desires to gain access to the Collocation Space. In order to permit reasonable access during construction of the Collocation Space, DTM may submit a request for its one (1) free accompanied site visit to its designated Collocation Space at any time subsequent to AT&T's receipt of the BFFO. In the event DTM desires access to its designated Collocation Space after the first accompanied free visit and DTM's access request form(s) has not been approved by AT&T or DTM has not yet submitted an access request form to AT&T, DTM shall be permitted to access the Collocation Space accompanied by an AT&T security escort, at DTM's expense, which will be assessed pursuant to the Security Escort fees contained in Exhibit B. DTM must request that escorted access be provided by AT&T to DTM's designated Collocation Space at least three (3) business days prior to the date such access is desired. An AT&T security escort will be required whenever DTM or its approved agent or supplier requires access to the entrance manhole.
- Lost or Stolen Access Devices. DTM shall immediately notify AT&T in writing when any of its Access Devices have been lost or stolen. If it becomes necessary for AT&T to re-key buildings or deactivate an Access Device as a result of a lost or stolen Access Device(s) or for failure of DTM's employees, suppliers, agents or Guest(s) to return an Access Device(s), DTM shall pay for the costs of re-keying the building or deactivating the Access Device(s).
- 5.14 Interference or Impairment
- 5.14.1 Notwithstanding any other provisions of this Attachment, DTM shall not use any product or service provided under this Agreement, any other service related thereto or used in combination therewith, or place or use any equipment or

Version: 2Q07 Standard ICA

facilities in any manner that (1) significantly degrades, interferes with or impairs service provided by AT&T or any other entity or any person's use of its telecommunications services; (2) endangers or damages the equipment, facilities or any other property of AT&T or any other entity or person; (3) compromises the privacy of any communications routed through the AT&T Premises; or (4) creates an unreasonable risk of injury or death to any individual or to the public. If AT&T reasonably determines that any equipment or facilities of DTM violates the provisions of this paragraph, AT&T shall provide written notice to DTM, which shall direct DTM to cure the violation within forty-eight (48) hours of DTM's receipt of written notice or, if such cure is not feasible, at a minimum, to commence curative measures within twenty-four (24) hours and exercise reasonable diligence to complete such measures as soon as possible thereafter. After receipt of the notice, the Parties agree to consult immediately and, if necessary, to conduct an inspection of the Collocation Space.

- 5.14.2 Except in the case of the deployment of an advanced service which significantly degrades the performance of other advanced services or traditional voice band services, if DTM fails to cure the violation within forty-eight (48) hours or, if such cure is not possible, to commence curative action within twenty-four (24) hours and exercise reasonable diligence to complete such action as soon as possible, or if the violation is of a character that poses an immediate and substantial threat of damage to property or injury or death to any person, or any other significant degradation, interference or impairment of AT&T's or another entity's service, then and only in that event. AT&T may take such action as it deems necessary to eliminate such threat including, without limitation, the interruption of electrical power to DTM's equipment and/or facilities. AT&T will endeavor, but is not required, to provide notice to DTM prior to the taking of such action and AT&T shall have no liability to DTM for any damages arising from such action, except to the extent that such action by AT&T constitutes willful misconduct.
- 5.14.3 For purposes of this Section, the term "significantly degrades" shall be defined as an action that noticeably impairs a service from a user's perspective. In the case of the deployment of an advanced service which significantly degrades the performance of other advanced services or traditional voice band services and DTM fails to cure the violation within forty-eight (48) hours, or if such cure is not possible, to commence curative action within twenty-four (24) hours and exercise reasonable diligence to complete such action as soon as possible, AT&T will establish before the appropriate Commission that the technology deployed is causing the significant degradation. Any claims of network harm presented to DTM or, if subsequently necessary, the Commission must be provided by AT&T with specific and verifiable information. When AT&T demonstrates that a certain technology deployed by DTM is significantly degrading the performance of other advanced services or traditional voice band services, DTM shall discontinue deployment of that technology and migrate its customers to other technologies that will not significantly degrade the performance of such services. Where the

Version: 2Q07 Standard ICA

only degraded service itself is a known disturber, and the newly deployed technology satisfies at least one of the criteria for a presumption that it is acceptable for deployment, pursuant to 47 C.F.R. § 51.230, the degraded service shall not prevail against the newly-deployed technology.

- 5.15 Personalty and Its Removal. Facilities and equipment placed by DTM in the Collocation Space shall not become a part of the Collocation Space, even if nailed, screwed or otherwise fastened to the Collocation Space, but shall retain their status as personal property and may be removed by DTM at any time. Any damage caused to the Collocation Space by DTM's employees, suppliers, agents or Guests during the installation or removal of such property shall be promptly repaired by DTM at its sole expense. If DTM decides to remove equipment and/or facilities from its Collocation Space and the removal requires no physical work be performed by AT&T and DTM's physical work includes, but is not limited to, power reduction, cross-connects, or tie pairs, AT&T will bill DTM the Administrative Only Application Fee associated with the type of removal activity performed by DTM, as set forth in Exhibit B. This nonrecurring fee will be billed on the date that AT&T provides an Application Response to DTM.
- Alterations. Under no condition shall DTM or any person acting on behalf of DTM make any rearrangement, modification, augment, improvement, addition, and/or other alteration which could affect in any way space, power, HVAC, and/or safety considerations to the Collocation Space or the AT&T Premises, hereinafter referred to individually or collectively as "Alterations", without the express written consent of AT&T, which shall not be unreasonably withheld. The cost of any such Alteration shall be paid by DTM. An Alteration shall require the submission of a Subsequent Application and will result in the assessment of the applicable application fee associated with the type of alteration requested, as set forth in Sections 6.2.1 and 7.1.4 below, which will be billed by AT&T on the date that AT&T provides DTM with an Application Response.
- 5.17 <u>Central Office Janitorial Service.</u> DTM shall be responsible for the general upkeep of its Collocation Space. DTM shall arrange directly with an AT&T Certified Supplier for janitorial services applicable to caged Collocation Space. Upon request, AT&T shall provide a list of such suppliers on an AT&T Premisesspecific basis.
- 5.18 <u>Upkeep of Remote Collocation Space.</u> DTM shall be responsible for the general upkeep and cleaning of the Remote Collocation Space. DTM shall be responsible for removing any of DTM's debris from the Remote Collocation Space and from in and around the Remote Site Location on each visit.
- 6 Ordering and Preparation of Collocation Space
- 6.1 <u>Initial Application.</u> For DTM's or DTM's Guest's(s') initial equipment placement, DTM shall input a physical Expanded Interconnection Application

Version: 2Q07 Standard ICA

Document (Initial Application) for physical Collocation Space directly into AT&T's electronic application (e.App) system for processing. The Initial Application is considered Bona Fide when it is complete and accurate, meaning that all of the required fields on the Initial Application are completed with the appropriate type of information. An Initial Application Fee, as set forth in Exhibit B, will apply to each Initial Application submitted by DTM for Central Office or Remote Site Collocation, as applicable, and will be billed by AT&T on the date AT&T provides DTM with an Application Response.

- 6.1.1 For Remote Site Collocation, a request for additional space at a later date will require the submission of an Initial Application. The installation of additional shelves/equipment within an existing bay does not require an Initial Application.
- 6.2 <u>Subsequent Application.</u> In the event DTM or DTM's Guest(s) desires to modify its use of the Collocation Space in a Central Office after a BFFO, DTM shall complete an application that contains all of the detailed information associated with a requested Alteration of the Collocation Space, as defined in Section 5.15 above (Subsequent Application). The Subsequent Application will be considered Bona Fide when it is complete and accurate, meaning that all of the required fields on the Subsequent Application have been completed with the appropriate type of information associated with the requested Alteration. AT&T shall determine what modifications, if any, to the AT&T Premises are required to accommodate the change(s) requested by DTM in the Subsequent Application. Such modifications to the AT&T Premises may include, but are not limited to, floor loading changes, changes necessary to meet HVAC requirements, changes to power plant requirements, equipment additions, etc.
- 6.2.1 Subsequent Application Fees. The application fee paid by DTM for an Alteration in a Central Office shall be dependent upon the level of assessment needed to provide a complete Application Response for the Alteration requested. Where the Subsequent Application does not require provisioning or construction work, but requires AT&T to perform an administrative activity, an Administrative Only Application Fee shall apply as set forth in Exhibit B. The Administrative Only Application Fee will apply to Subsequent Applications associated with a transfer of ownership of the Collocation Space, the addition, exchange or removal of equipment from the Collocation Space (where the removal requires no physical work to be performed by AT&T which require no additional space, power or terminations to be provided to DTM's collocation arrangement), and a virtual-tophysical conversion (in place). The Co-Carrier Cross Connect/Direct Connect Application Fee will apply when DTM submits a Subsequent Application for a direct connection between its own physical and virtual Collocation Space(s) in the same AT&T Central Office or between its physical or virtual Collocation Space and that of another collocated telecommunications carrier within the same AT&T Central Office. In Florida and Tennessee, the Power Reconfiguration Only Application Fee will apply when DTM submits a Subsequent Application that reflects only an upgrade or reduction in the amount of power that AT&T is

Version: 2Q07 Standard ICA

currently providing to DTM's physical Collocation Space in a Central Office. The fee for a Subsequent Application, for which the Alteration requested has limited effect (e.g., requires limited assessment and sufficient cable support structure, HVAC, power and terminations are available), shall be the Subsequent Application Fee, as set forth in Exhibit B. The appropriate nonrecurring application fee will be billed on the date that AT&T provides DTM with an Application Response.

- Availability Report for the AT&T Premises, DTM may submit up to three (3) space preferences on its application by identifying the specific space identification numbers referenced on the Space Availability Report for the space it is requesting. In the event AT&T cannot accommodate DTM's space preference(s), DTM may accept the space allocated by AT&T or cancel its application and submit another application requesting additional space preferences for the same AT&T Premises. This application will be treated as a new application and the appropriate application fee will apply. The application fee will be billed by AT&T on the date that AT&T provides DTM with an Application Response.
- 6.4 Space Availability Notification
- 6.4.1 For all states except Florida and Tennessee, AT&T will respond to an application within ten (10) days as to whether space is available or not available within the requested AT&T Premises. In Florida and Tennessee, AT&T will respond to an application within fifteen (15) days as to whether space is available or not available within an AT&T Premises. AT&T's e.App system will reflect when DTM's application is Bona Fide. If the application cannot be Bona Fide, AT&T will identify what revisions are necessary for the application to become Bona Fide.
- 6.4.2 If the amount of space requested is not available, AT&T will notify DTM of the amount of space that is available and no application fee will apply. When AT&T's response includes an amount of space less than that requested by DTM or space that is configured differently, no application fee will apply. If DTM decides to accept the available space, DTM must resubmit its application to reflect the actual space available, including the configuration of the space, prior to submitting a BFFO. When DTM resubmits its application to accept the available space, AT&T will bill DTM the appropriate application fee.
- Denial of Application. If AT&T notifies DTM that no space is available (Denial of Application), AT&T will not assess an application fee to DTM. After notifying DTM that AT&T has no available space in the requested AT&T Premises, AT&T will allow DTM, upon request, to tour the entire AT&T Premises within ten (10) days of such Denial of Application. In order to schedule this tour, AT&T must receive the request for the tour of the AT&T Premises within five (5) days of the Denial of Application.
- 6.6 Petition for Waiver. Upon Denial of Application, AT&T will timely file a

Version: 2Q07 Standard ICA

petition with the appropriate Commission pursuant to 47 U.S.C. § 251(c)(6). AT&T shall provide to the Commission any information requested by that Commission. Such information shall include which space, if any, AT&T or any of AT&T's affiliates have reserved for future use and a detailed description of the specific future uses for which the space has been reserved. Subject to an appropriate nondisclosure agreement or provision, AT&T shall permit DTM to inspect any floor plans or diagrams that AT&T provides to the Commission.

# 6.7 <u>Waiting List</u>

- On a first-come, first-serve basis, which is governed by the date of receipt of an application or Letter of Intent, AT&T will maintain a waiting list of requesting telecommunications carriers that have either received a Denial of Application or, where it is publicly known that an AT&T Premises is out of space, have submitted a Letter of Intent to collocate in that AT&T Premises. AT&T will notify each telecommunications carrier on the waiting list that can be accommodated by the amount of space that becomes available, according to the position of the telecommunications carrier on said waiting list.
- In Florida, on a first-come, first-serve basis, which is governed by the date of receipt of an application or Letter of Intent, AT&T will maintain a waiting list of requesting telecommunications carriers that have either received a Denial of Application or, where it is publicly known that an AT&T Premises is out of space, have submitted a Letter of Intent to collocate in that AT&T Premises. Sixty (60) days prior to space becoming available, if known, AT&T will notify the Commission and the telecommunications carriers on the waiting list by mail when space will become available. If AT&T does not know sixty (60) days in advance of when space will become available, AT&T will notify the Commission and the telecommunications carriers on the waiting list within two (2) business days of the determination that space will become available. A telecommunications carrier that, upon denial of physical Collocation Space, requests virtual Collocation Space shall automatically be placed on the waiting list for physical Collocation Space that may become available in the future.
- When physical Collocation Space becomes available, DTM must submit an updated, complete and accurate application to AT&T within thirty (30) days of notification by AT&T that physical Collocation Space will be available in the requested AT&T Premises previously out of space. If DTM has originally requested caged Collocation Space and cageless Collocation Space becomes available, DTM may refuse such space and notify AT&T in writing, within the thirty (30) day timeframe referenced above, that DTM wishes to maintain its place on the waiting list for caged physical Collocation Space, without accepting the available cageless Collocation Space.
- 6.7.4 DTM may accept an amount of space less than what it originally requested by submitting an application as set forth above, and upon request, may maintain its position on the waiting list for the remaining space that was initially requested. If

Version: 2Q07 Standard ICA

DTM does not submit an application or notify AT&T in writing within the thirty (30) day timeframe as described in Section 6.7.2 above, AT&T will offer the available space to the next telecommunications carrier on the waiting list and remove DTM from the waiting list. Upon request, AT&T will advise DTM as to its position on the waiting list for a particular AT&T Premises.

Public Notification. AT&T will maintain on its Interconnection Web site, a notification document that will indicate all AT&T Premises that are without available space. AT&T shall update such document within ten (10) days of the date that AT&T becomes aware that insufficient space is available to accommodate physical Collocation. AT&T will also post a document on its Interconnection Web site that contains a general notice when space becomes available in an AT&T Premises previously on the space exhaust list.

# 6.9 <u>Application Response</u>

- In Alabama, Georgia, Kentucky, Louisiana, Mississippi, North Carolina and South Carolina, when space has been determined to be available for physical (caged or cageless) Collocation arrangements, AT&T will provide an Application Response within twenty (20) days of receipt of a Bona Fide application. The Application Response will be a written response that includes sufficient information to enable DTM to place a Firm Order, which, at a minimum, will include the configuration of the space, the Cable Installation Fee, the Cable Records Fee, and any other applicable space preparation fees, as described in Section 8 below.
- In Florida and Tennessee, within fifteen (15) days of receipt of a Bona Fide application, when space has been determined to be available or when a lesser amount of space than that requested is available, then with respect to the space available, AT&T will provide an Application Response including sufficient information to enable DTM to place a Firm Order. The Application Response will include, at a minimum, the configuration of the space, the Cable Installation Fee, the Cable Records Fee and any other applicable space preparation fees, as described in Section 8 below. When DTM submits ten (10) or more applications within ten (10) days, the initial fifteen (15) day response interval will increase by ten (10) days for every additional ten (10) applications or fraction thereof.
- Application Modifications. If a modification or revision is made to any information in the Bona Fide application after AT&T has provided the Application Response and prior to a BFFO, with the exception of modifications to (1) Customer Information, (2) Contact Information or (3) Billing Contact Information, whether at the request of DTM or as necessitated by technical considerations, the application shall be considered a new application and handled as a new application with respect to the response and provisioning intervals. AT&T will charge DTM the appropriate application fee associated with the level of assessment performed by AT&T, pursuant to Sections 6.1 and 6.2 above.

Version: 2Q07 Standard ICA

### 6.11 Bona Fide Firm Order

- DTM shall indicate its intent to proceed with a Collocation Space request in an AT&T Premises by submitting a BFFO to AT&T. The BFFO must be received by AT&T no later than thirty (30) days after AT&T's Application Response to DTM's Bona Fide application or DTM's application will expire.
- AT&T will establish a Firm Order date based upon the date AT&T is in receipt of DTM's BFFO. AT&T will acknowledge the receipt of DTM's BFFO within seven (7) days of receipt, so that DTM will have positive confirmation that its BFFO has been received. AT&T's response to a BFFO will include a Firm Order Confirmation, which contains the firm order date. No revisions may be made to a BFFO.

# 7 Construction and Provisioning

# 7.1 <u>Construction and Provisioning Intervals</u>

- 7.1.1 In Florida and Tennessee, AT&T will complete construction of physical Collocation Space as soon as possible within a maximum of ninety (90) days from receipt of a BFFO or as agreed to by the Parties. For virtual Collocation Space, AT&T will complete construction as soon as possible within a maximum of sixty (60) days from receipt of a BFFO or as agreed to by the Parties. For Alterations requested to Collocation Space after the initial space has been completed, AT&T will complete construction for Collocation Space as soon as possible within a maximum of forty-five (45) days from receipt of a BFFO or as agreed to by the Parties, as long as no additional space has been requested by DTM. If additional space has been requested by DTM, AT&T will complete construction for the requested Collocation Space as soon as possible within a maximum of ninety (90) days from receipt of a BFFO for physical Collocation Space and forty five (45) days from receipt of a BFFO for virtual Collocation Space. If AT&T does not believe that construction will be completed within the relevant provisioning interval and AT&T and DTM cannot agree upon a completion date, within fortyfive (45) days of receipt of the BFFO for an initial request, or within thirty (30) days of receipt of the BFFO for an Alteration, AT&T may seek an extension from the Commission.
- 7.1.2 In Alabama, Georgia, Kentucky, Louisiana, Mississippi, North Carolina and South Carolina, AT&T will complete construction for caged physical Collocation Space under ordinary conditions as soon as possible within a maximum of ninety (90) days from receipt of a BFFO or as agreed to by the Parties. AT&T will complete construction for cageless physical Collocation Space under ordinary conditions as soon as possible within a maximum of sixty (60) days from receipt of a BFFO and ninety (90) days from receipt of a BFFO for extraordinary conditions, or as agreed to by the Parties. Ordinary conditions are defined as space available with only minor changes required to AT&T's support systems. (Examples include, but are not limited to: minor modifications to HVAC, cabling and AT&T's power plant.) Extraordinary conditions include, but may not be

Version: 2Q07 Standard ICA

limited to: major AT&T equipment rearrangements or additions; power plant additions or upgrades; major mechanical additions or upgrades; major upgrades for ADA compliance; environmental hazards or hazardous materials abatement; and arrangements for which equipment shipping intervals are extraordinary in length. The Parties may mutually agree to renegotiate an alternative provisioning interval for the Collocation Space requested or AT&T may seek a waiver from the ordered interval, as set forth above, from the appropriate Commission, if AT&T does not believe that construction will be completed within the relevant provisioning interval.

- 7.1.3 Records Only Change. When DTM adds equipment, that was originally included on DTM's Initial Application or a Subsequent Application, and the installation of this equipment requires no additional space preparation work or cable terminations on the part of AT&T, then AT&T will impose no additional charges or intervals.
- 7.1.4 For Central Offices in the states of Alabama, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, and South Carolina, AT&T will provide the reduced intervals outlined below to DTM, when DTM requests an Alteration specifically identified in Sections 7.1.4.1 through 7.1.4.9 below as an "Augment". Except as otherwise set forth in Section 7.1.4.10 below, such Augment will require a Subsequent Application and will result in the assessment of the appropriate application fee associated with the type of Augment requested by DTM. AT&T will assess the appropriate nonrecurring application fee set forth in Exhibit B on the date that it provides an Application Response to DTM.
- 7.1.4.1 Simple Augments will be completed within twenty (20) days after receipt of the BFFO for an:
  - Extension of Existing AC Circuit Capacity within Arrangement where Sufficient Circuit Capacity is Available
  - Fuse Change and/or Increase or Decrease -48 Volt (-48V) DC Power
- 7.1.4.2 Minor Augments will be completed within forty-five (45) days after receipt of the BFFO for:
  - 168 DS1 Terminations at the AT&T Demarcation Frame (Databasing Only; Panels, Relay Racks and Overhead Racking Exist)
  - 96 DS3 Terminations at the AT&T Demarcation Frame (Databasing Only;
     Panels, Relay Racks and Overhead Racking Exist)
  - 99 Fiber terminations at the AT&T Demarcation Frame (Databasing Only; Panels, Relay Racks and Overhead Racking Exist)
  - Maximum of 2000 Service Ready DS0 Terminations at the AT&T Demarcation Frame (Databasing Only; Panels, Relay Racks and Overhead Racking Exist)
- 7.1.4.3 Intermediate Augments will be completed within sixty (60) days after receipt of

Version: 2Q07 Standard ICA

#### the BFFO for:

- 168 DS1s (Databasing and Installation of Termination Panels, Relay Racks or Additional Structure, as Required)
- 96 DS3s (Databasing and Installation of Termination Panels, Relay Racks or Additional Structure, as Required)
- 99 Fiber Terminations (Databasing and Installation of Termination Panels, Relay Racks or Additional Structure, as Required)
- 2000 DS0s (Databasing and Installation of Termination Panels, Relay Racks or Additional Structure, as Required)
- Installation of Cable Racking or Other Support Structure, as Required, to Support CCXCs (Adequate Floor or Ceiling Structural Capacity Exists and Support/Protection structure for Fiber Patch Cord is Excluded)
- 7.1.4.4 Major Augments of physical Collocation Space will be completed within ninety (90) days after BFFO. All requests for additional Physical Collocation Space (caged or cageless) are included in this category.
- 7.1.4.5 Major Augments of virtual Collocation Space will be completed within seventy-five (75) days after BFFO. This category includes all requests for additional virtual Collocation Space.
- 7.1.4.6 If DTM submits an Augment that includes two (2) Augment items from the same category in either Sections 7.1.4.1, 7.1.4.2 or 7.1.4.3 above, the provisioning interval associated with the next highest Augment category will apply (e.g., if two (2) items from the Minor Augment category are requested on the same request, then an interval of sixty (60) days from the receipt of the BFFO would apply, which is the interval associated with the Intermediate Augment category).
- 7.1.4.7 If DTM submits an Augment that includes three (3) Augment items from the same category in either Sections 7.1.4.1, 7.1.4.2, or 7.1.4.3 above, the Major Augment interval of ninety (90) days from the receipt of the BFFO would apply (e.g., if three (3) items from the Simple Augment category are requested on the same request for a physical Collocation arrangement, then an interval of ninety (90) days from the receipt of the BFFO would apply, which is the Major physical Augment interval; likewise if three (3) items from the Simple Augment category are requested on the same request for a virtual Collocation arrangement, then an interval of seventy-five (75) days from the receipt of the BFFO would apply, which is the Major virtual Augment interval).
- 7.1.4.8 If DTM submits an Augment that includes one (1) Augment item from two (2) separate categories in Sections 7.1.4.1, 7.1.4.2 and 7.1.4.3 above, the Augment interval associated with the highest Augment category will apply (e.g., if an item from the Minor Augment category and an item from the Intermediate Augment category are requested on the same request, then an interval of sixty (60) days

Version: 2Q07 Standard ICA

from the receipt of the BFFO would apply, which is the interval associated with the Intermediate Augment category).

- All Augments not expressly included in the Simple, Minor, Intermediate or Major Augment categories, as outlined above, will be placed into the appropriate category as negotiated by DTM and AT&T. If DTM and AT&T are unable to determine the appropriate category through negotiation, then the appropriate Major Augment category, identified in Sections 7.1.4.4 and Section 7.1.4.5 above, would apply based on whether the Augment is for DTM's physical or virtual Collocation Space.
- 7.1.4.10 Individual application fees associated with Simple, Minor and Intermediate Augments are contained in Exhibit B. If DTM requests multiple items from different Augment categories, AT&T will bill DTM the Augment application fee, as identified in Exhibit B, associated with the higher Augment category only. The appropriate application fee will be assessed to DTM at the time AT&T provides DTM with the Application Response. DTM will be assessed a Subsequent Application Fee for all Major Augments (Major Augments are defined above in Sections 7.1.4.4 and 7.1.4.5 above for physical and virtual Collocation Space, respectively). The Subsequent Application Fee is also reflected in Exhibit B.
- Joint Planning. Unless otherwise agreed to by the Parties, a joint planning meeting or other method of joint planning between AT&T and DTM will commence within a maximum of twenty (20) days from AT&T's receipt of a BFFO. At such meeting, the Parties will agree to the preliminary design of the Collocation Space and the equipment configuration requirements, as reflected in the application and affirmed in the BFFO.
- 7.3 <u>Permits.</u> Each Party, its agent(s) or AT&T Certified Supplier(s) will diligently pursue filing for the permits required for the scope of work to be performed by that Party, its agent(s) or AT&T Certified Supplier(s) within ten (10) days of the completion of the finalized construction design and specifications.
- 7.4 Central Office Circuit Facility Assignments
- 7.4.1 Unless otherwise specified, AT&T will provide Circuit Facility Assignments (CFAs) to DTM prior to the applicable provisioning interval set forth herein (Provisioning Interval) for those AT&T Premises in which DTM has physical Collocation Space with no POT bay or with a grandfathered POT bay provided by AT&T. AT&T cannot provide CFAs to DTM prior to the Provisioning Interval for those AT&T Premises in which DTM has physical Collocation Space with a POT bay provided by DTM or virtual Collocation Space, until DTM has provided AT&T with the following information:
- 7.4.1.1 For physical Central Office Collocation Space with a DTM-provided POT bay, DTM shall provide AT&T with a complete layout of the POT panels on an Equipment Inventory Update (EIU) form that shows the locations, speeds, etc.; or

Version: 2Q07 Standard ICA

- 7.4.1.2 For virtual Central Office Collocation Space, DTM shall provide AT&T with a complete layout of DTM's equipment on an EIU form, that includes the locations of the low speed ports and the specific frame terminations to which the equipment will be wired by DTM's AT&T Certified Supplier.
- AT&T cannot begin work on the CFAs until the complete and accurate EIU form has been received from DTM. If the EIU form is provided within ten (10) days prior to the ending date of the Provisioning Interval, then the CFAs will be made available by the ending date of the Provisioning Interval. If the EIU form is not received ten (10) days prior to the ending date of the Provisioning Interval, then the CFAs will be provided within ten (10) days of AT&T's receipt of the EIU form.
- 7.4.3 AT&T will bill DTM a nonrecurring charge, as set forth in Exhibit B, each time DTM requests a resend of its original CFA information for any reason other than an AT&T error in the CFAs initially provided to DTM.
- 7.5 Use of AT&T Certified Supplier. DTM shall select a supplier which has been approved as an AT&T Certified Supplier to perform all engineering and installation work. DTM, if an AT&T Certified Supplier or DTM's AT&T Certified Supplier must follow and comply with all of AT&T's specifications and the following AT&T Technical Requirements: TR 73503, TR 73519, TR 73572 and TR 73564. Unless the AT&T Certified Supplier has met the requirements for all of the required work activities, DTM must use a different AT&T Certified Supplier for the work activities associated with transmission equipment, switching equipment and power equipment. AT&T shall provide DTM with a list of AT&T Certified Suppliers, upon request. DTM, if an AT&T Certified Supplier, or DTM's AT&T Certified Supplier(s) shall be responsible for installing DTM's equipment and associated components, extending power cabling to the AT&T power distribution frame, performing operational tests after installation is complete, and notifying AT&T's equipment engineers and DTM upon successful completion of the installation and any associated work. When an AT&T Certified Supplier is used by DTM, the AT&T Certified Supplier shall bill DTM directly for all work performed for DTM pursuant to this Attachment. AT&T shall have no liability for nor responsibility to pay, such charges imposed by DTM's AT&T Certified Supplier. AT&T shall make available its supplier certification program to DTM or any supplier proposed by DTM and will not unreasonably withhold certification. All work performed by or for DTM shall conform to generally accepted industry standards.
- Alarms and Monitoring. AT&T shall place environmental alarms in the AT&T Premises for the protection of AT&T equipment and facilities. DTM shall be responsible for the placement, monitoring and removal of environmental and equipment alarms used to service DTM's Collocation Space. Upon request, AT&T will provide DTM with an applicable AT&T tariffed service(s) to facilitate remote monitoring of collocated equipment by DTM. Both Parties shall use best efforts to notify the other of any verified environmental condition (e.g.,

Version: 2Q07 Standard ICA

temperature extremes or excess humidity) known to that Party.

- 7.7 Virtual to Physical Relocation. In the event physical Collocation Space was previously denied at an AT&T Central Office due to technical reasons or space limitations and physical Collocation Space has subsequently become available, DTM may relocate its existing virtual Collocation arrangement(s) to a physical Collocation arrangement(s) and pay the appropriate fees associated with the rearrangement or reconfiguration of the services being terminated into the virtual Collocation arrangement, as set forth in Exhibit B. If AT&T knows when additional physical Collocation Space may become available at the AT&T Central Office requested by DTM, such information will be provided to DTM in AT&T's written denial of physical Collocation Space. DTM must arrange with an AT&T Certified Supplier for the relocation of equipment from a virtual Collocation Space to a physical Collocation Space and will bear the cost of such relocation, including the costs associated with moving the services from the virtual Collocation Space to the new physical Collocation Space.
- 7.7.1 In Alabama, AT&T will complete a relocation of a virtual collocation arrangement to a cageless physical collocation arrangement within sixty (60) days from AT&T's receipt of a BFFO and from a virtual collocation arrangement to a caged physical collocation arrangement within ninety (90) days from AT&T's receipt of a BFFO.
- 7.8 <u>Virtual to Physical Conversion (In-Place)</u>
- Virtual collocation arrangements in Central Offices may be converted to "in-place" physical caged collocation arrangements if the potential conversion meets all of the following criteria: (1) there is no change in the amount of equipment or the configuration of the equipment that was in the virtual Collocation Space; (2) the conversion of the virtual collocation arrangement will not cause the equipment or the results of that conversion to be located in a space that AT&T has reserved for its own future needs; and (3) any changes to the arrangement can be accommodated by existing power, HVAC, and other requirements. Unless otherwise specified herein, AT&T will complete virtual to physical Collocation Space conversions (in-place) within sixty (60) days from receipt of the BFFO. AT&T will bill DTM an Administrative Only Application Fee, as set forth in Exhibit B, on the date AT&T provides an Application Response to DTM.
- 7.8.2 In Alabama and Tennessee, AT&T will complete virtual to physical conversions (in place) within thirty (30) days from receipt of the BFFO as long as the conversion meets all of the criteria specified in Section 7.8.1 above.
- 7.9 <u>Cancellation.</u> Unless otherwise specified in this Attachment, if at any time prior to Space Acceptance, DTM cancels its order for Collocation Space (Cancellation), AT&T will bill the applicable nonrecurring charge(s) for any and all work processes for which work has begun or been completed. In Florida, if DTM cancels its order for Collocation Space at any time prior to the Space Ready Date,

Version: 2Q07 Standard ICA

no cancellation fee shall be assessed by AT&T; however, DTM will be responsible for reimbursing AT&T for any costs specifically incurred by AT&T on behalf of DTM up to the date that the written notice of cancellation was received by AT&T. In Georgia, if DTM cancels its order for Collocation Space at any time prior to space acceptance, AT&T will bill DTM for all costs incurred prior to the date of Cancellation and for any costs incurred as a direct result of the Cancellation, not to exceed the total amount that would have been due had the Firm Order not been canceled.

- 7.10 <u>Licenses.</u> DTM, at its own expense, will be solely responsible for obtaining from governmental authorities, and any other appropriate agency, entity, or person, all rights, privileges, permits, licenses and certificates necessary or required to operate as a provider of telecommunications services to the public or to build-out, equip and/or occupy Collocation Space in an AT&T Premises.
- 7.11 <u>Environmental Compliance.</u> The Parties agree to utilize and adhere to the Environmental Hazard Guidelines identified in Exhibit A attached hereto.

## **8** Rates and Charges

- 8.1 <u>Rates.</u> DTM agrees to pay the rates and charges identified in Exhibit B attached hereto.
- 8.1.1 In Tennessee, if DTM elects the TRA rates as set forth in Exhibit C, the additional language also set forth in Exhibit C for Application Fee, Space Preparation, Floor Space and Caged Collocation Power Usage metering, will be effective in conjunction with the remaining terms and conditions of this Attachment.
- 8.1.2 Should DTM elect to transition to the TRA Option after the execution of this Agreement, DTM shall notify AT&T in writing sixty (60) days prior to the implementation of this election.
- 8.2 <u>Application Fees.</u> AT&T shall assess any nonrecurring application fees within thirty (30) days of the date that AT&T provides an Application Response to DTM or on DTM's next scheduled monthly billing statement.

### 8.3 <u>Recurring Charges</u>

8.3.1 If DTM has met the applicable fifteen (15) day acceptance walk through interval specified in Section 4.2 above, billing for recurring charges will begin upon the Space Acceptance Date. In the event DTM fails to complete an acceptance walk through within the applicable fifteen (15) day interval, billing for recurring charges will commence on the Space Ready Date. If DTM occupies the space prior to the Space Ready Date, the date DTM occupies the space is deemed the Space Acceptance Date and billing for recurring charges will begin on that date. The billing for all applicable monthly recurring charges will begin in DTM's next billing cycle and will include any prorated charges for the period from DTM's Space Acceptance Date or Space Ready Date, whichever is appropriate pursuant to Section 4.2 above, to the date the bill is issued by AT&T.

Version: 2Q07 Standard ICA

- 8.3.2 Unless otherwise stated in Section 8.6 below, monthly recurring charges for -48V DC power will be assessed per fused ampere (amp), per month, based upon the total number of fused amps of power capacity requested by DTM on DTM's Initial Collocation Application and all Subsequent Collocation Applications, which may either increase or decrease the originally requested, and any subsequently augmented, number of fused amps of power capacity requested, consistent with Commission orders.
- 8.3.3 AT&T shall have the right to inspect and inventory any DC power fuse installations at an AT&T BDFB or DC power circuit installations at AT&T's main power board for any DTM collocation arrangement, to verify that the total number of fused amps of power capacity installed by DTM's AT&T Certified Supplier matches the number of fused amps of DC power capacity requested by DTM on DTM's Initial Application and all Subsequent Applications. If AT&T determines that DTM's AT&T Certified Supplier has installed more DC capacity than DTM requested on its Initial Application and all Subsequent Applications, AT&T shall notify DTM in writing of such discrepancy and shall assess DTM for the additional DC power fuse/circuit capacity from the Space Acceptance Date or Space Ready Date, whichever is applicable pursuant to Section 8.3.1 above, for the most recent Initial Application or Subsequent Application, submitted for such collocation arrangement. AT&T shall also revise DTM's recurring DC power charges, on a going-forward basis, to reflect the higher number of fused amps of power capacity available for the collocation arrangement.
- Nonrecurring Charges. Unless specified otherwise herein, AT&T shall assess nonrecurring charges, including all application fees, within thirty (30) days of the date that AT&T provides an Application Response to DTM or on DTM's next scheduled monthly billing statement, if DTM's current month's billing cycle has already closed. Nonrecurring charges associated with the processing of the Firm Order for collocation space preparation (Firm Order Processing Fee) shall be billed by AT&T within thirty (30) days of AT&T's confirmation of DTM's BFFO or on DTM's next scheduled monthly billing statement.
- In some cases, Commissions have ordered AT&T to separate its disconnect costs and its installation costs into two separate nonrecurring charges. Accordingly, unless otherwise noted in this Agreement, the Commission ordered disconnect charges will be applied at the time the disconnect activity is performed by AT&T, regardless of whether or not a disconnect order is issued by DTM. Disconnect charges are set forth in Exhibit B of this Attachment.
- 8.6 <u>Central Office Space Preparation.</u> Space preparation fees consist of a nonrecurring charge for Firm Order Processing and monthly recurring charges for Central Office Modifications and Common Systems Modifications. For all states except Florida, DTM shall remit the payment of the nonrecurring Firm Order Processing Fee coincident with the submission of DTM's BFFO. In Florida, the nonrecurring Firm Order Processing Fee will be billed by AT&T, pursuant to Section 8.4 above. The monthly recurring charge for Central Office

Version: 2Q07 Standard ICA

Modifications will be assessed per arrangement, per square foot, for both caged and cageless physical Collocation Space. The monthly recurring charge for Common Systems Modifications will be assessed per arrangement, per square foot for cageless physical Collocation Space and on a per cage basis for caged physical Collocation Space. These charges recover the costs associated with preparing the Collocation Space, which includes, but is not limited to, the following items: a survey, engineering of the Collocation Space, and design and modification costs for network, building and support systems.

- 8.7 Central Office Floor Space. The Floor Space Charge includes reasonable charges for lighting, HVAC, and other allocated expenses associated with maintenance of the AT&T Premises; however, this charge does not include any expenses associated with AC or DC power supplied to DTM's Collocation Space for the operation of DTM's equipment. For caged physical Collocation Space, DTM shall pay floor space charges based upon the number of square feet enclosed. The minimum size for caged Collocation Space is fifty (50) square feet. Additional caged Collocation Space may be requested in increments of fifty (50) square feet. For cageless Collocation Space, DTM shall pay floor space charges based upon the following floor space calculation: [(depth of the equipment lineup in which the rack is placed) + (0.5 x maintenance aisle depth) + (0.5 x wiring aisle depth)] x (width of rack and spacers). For purposes of this calculation, the depth of the equipment lineup shall consider the footprint of equipment racks plus any equipment overhang. AT&T will assign cageless Collocation Space in conventional equipment rack lineups where feasible. In the event DTM's collocated equipment requires special cable racking, an isolated ground plane, or any other considerations and treatment which prevents placement within conventional equipment rack lineups, DTM shall be required to request an amount of floor space sufficient to accommodate the total equipment arrangement.
- 8.8 Remote Site Bay Space. In a Remote Site, the bay space charge recovers the costs associated with air conditioning, ventilation and other allocated expenses for the maintenance of the Remote Site Location, and includes the amperage necessary to power DTM's equipment. DTM shall remit bay space charges based upon the number of bays requested. AT&T will assign Remote Site Collocation Space in conventional Remote Site bay lineups where feasible.
- 8.9 Power
- 8.9.1 In a Central Office AT&T shall make available -48V DC power for DTM's Collocation Space at an AT&T BDFB. When obtaining DC power from an AT&T BDFB, DTM's fuses and power cables (for the A & B feeds) must be engineered (sized), and installed by DTM's AT&T Certified Supplier, in accordance with the number of fused amps of DC power requested by DTM on DTM's Initial Application and any Subsequent Applications. DTM is also responsible for contracting with an AT&T Certified Supplier to run the power distribution feeder cable from the AT&T BDFB to the equipment in DTM's Collocation Space. The AT&T Certified Supplier contracted by DTM must

Version: 2Q07 Standard ICA

provide AT&T with a copy of the engineering power specifications prior to the day on which DTM's equipment becomes operational (hereinafter "Commencement Date"). AT&T will provide the common power feeder cable support structure between the AT&T BDFB and DTM's Collocation Space. DTM shall contract with an AT&T Certified Supplier who shall be responsible for performing those power provisioning activities required to enable DTM's equipment to become operational, which may include, but are not limited to, the installation, removal or replacement of the following: dedicated power cable support structure within DTM's Collocation Space, power cable feeds and terminations of the power cabling. DTM and DTM's AT&T Certified Supplier shall comply with all applicable NEC, AT&T TR 73503, Telcordia and ANSI Standards that address power cabling, installation and maintenance.

- 8.9.1.1 At a Remote Site, AT&T shall make available -48V DC power for DTM's Remote Collocation Space at a BDFB within the Remote Site Location. The charge for power shall be assessed as part of the recurring charge for bay space, as referenced in Section 8.7 above. If the power requirements for DTM's equipment exceed the capacity available, then such additional power requirements shall be assessed on an individual case basis.
- In Florida Central Offices only, subject to technical feasibility, commercial availability and safety limitations, AT&T will permit DTM to request DC power in five (5) amp increments from five (5) amps up to one hundred (100) amps from the AT&T BDFB. However, in accordance with industry standard fuse sizing, DTM may request that AT&T provision DC power of seventy (70) amps or greater directly from AT&T's main power board. The industry standard fuse size (which is a circuit breaker on the main power board) available at an AT&T main power board in all AT&T Premises is a two hundred twenty-five (225) amp circuit breaker.
- 8.9.3 AT&T will revise DTM's Central Office recurring power charges, in accordance with Section 8.3 above, to reflect a power upgrade when DTM submits a Subsequent Application requesting an increase in the number of fused amps it is currently receiving from AT&T for its Collocation Space. If DTM's existing fuses and power cables (for the A&B power feed) are not sufficient to support the additional number of fused amps requested, DTM's AT&T Certified Supplier shall perform whatever activities are necessary, which may include the installation of new/additional fuses or power cables, to comply with the appropriate NEC, AT&T TR 73503, Telcordia and ANSI Standards, as well as the requirements noted in Sections 8.7 and 8.7.1 above. DTM's AT&T Certified Supplier shall provide notification to AT&T when these activities have been completed.
- 8.9.4 AT&T will revise DTM's Central Office recurring power charges, in accordance with Section 8.3 above, to reflect a power reduction upon AT&T's receipt of the Power Reduction Form from DTM, certifying the completion of the power reduction work, including the removal of any associated power cabling by DTM's

Version: 2Q07 Standard ICA

AT&T Certified Supplier. Notwithstanding the foregoing, if DTM's AT&T Certified Supplier has not removed or, at AT&T's discretion, cut the power cabling within thirty (30) days, the power reduction will not become effective until the cabling is removed or, at AT&T's discretion, cut by DTM's AT&T Certified Supplier and DTM shall pay for the amount of power that had been requested prior to the power reduction request for the period up to the date the power cabling is actually removed.

- 8.9.5 If DTM requests an increase or a reduction in the amount of power that AT&T is currently providing in a Central Office, DTM must submit a Subsequent Application. In all states other than Florida and Tennessee if no modification to the Collocation Space is requested other than the increase or reduction in power, the Simple Augment fee will apply. In Florida and Tennessee the Power Reconfiguration Only Application Fee as set forth in Exhibit B will apply. If modifications are requested in addition to the increase or reduction of power, the Subsequent Application Fee will apply. AT&T will bill this nonrecurring fee on the date that AT&T provides an Application Response to DTM's Subsequent Application.
- 8.9.5.1 In Central Offices in Alabama and Louisiana, if DTM has existing power configurations currently served from the AT&T main power board and requests that its power be reconfigured to connect to an AT&T BDFB, in a specific AT&T Premises, DTM must submit a Subsequent Application to AT&T. AT&T will provide a response to such application within seven (7) days and no Simple Augment Application Fee will be assessed by AT&T for this one time only power reconfiguration to an AT&T BDFB. For any power reconfigurations thereafter, DTM will submit a Subsequent Application and the appropriate Simple Augment Application Fee will apply.
- 8.9.6 If DTM elects to install its own DC Power Plant, AT&T shall provide AC power to feed DTM's DC Power Plant. Charges for AC power will be assessed on a per breaker ampere, per month basis, pursuant to the rates specified in Exhibit B. The AC power rates include recovery for the provision of commercial and standby AC power. When obtaining power from an AT&T service panel, protection devices and power cables must be engineered (sized) and installed by DTM's AT&T Certified Supplier, with the exception that AT&T shall engineer and install protection devices and power cables for Adjacent Collocation. DTM's AT&T Certified Supplier must provide a copy of the engineering power specifications prior to the Commencement Date. AC power voltage and phase ratings shall be determined on a per location basis. At DTM's option, DTM may arrange for AC power in an adjacent collocation arrangement from a retail provider of electrical power.
- 8.9.7 DTM shall contract with an AT&T Certified Supplier to perform the installation and removal of dedicated power cable support structure within DTM's arrangement and terminations of cable within the Collocation Space.

Version: 2Q07 Standard ICA

8.9.8 <u>Fused Amp Power.</u> In all states, except as otherwise set forth in this Agreement, AT&T shall make available -48V DC power on a per fused amp, per month basis, pursuant to the following:

<u>For power provisioned from a BDFB.</u> The number of fused amps requested by DTM on its collocation application for power that is being provisioned from an AT&T BDFB will be multiplied by the DC power fused amp rate set forth in Exhibit B. A minimum of ten (10) fused amps is required.

For existing power configurations that are provisioned from AT&T's main power board. The number of fused amps made available at the main power board, in increments of two hundred and twenty-five (225) amps/main power board circuit, will be multiplied by the DC power fused amp rate set forth in Exhibit B.

## 8.9.9 Florida Power Usage Option

8.9.9.1 In Central Offices in Florida only, DTM may request that -48 DC power provisioned by AT&T to DTM's Collocation Space be assessed per amp, per month based upon amps used, pursuant to the rates set forth in Exhibit B. Monthly recurring power charges will be assessed on the Space Acceptance Date or Space Ready Date, whichever is appropriate, pursuant to Section 8.3 above. If DTM desires to convert existing physical collocation arrangements to the Florida Power Usage Option (hereinafter "FL Option"), then the monthly recurring power charges that are applicable to the FL Option, contained in Exhibit B, will be assessed on the Space Ready Date associated with the Subsequent Application submitted by DTM to convert an existing collocation arrangement to the FL Option. The monthly recurring charges for DC power, under the FL Option, shall be calculated and applied based on the amount of power DTM requests that it be allowed to draw at a given time to a specific physical collocation arrangement in a particular AT&T Premises on DTM's Initial Application or Subsequent Application. AT&T shall allow DTM at DTM's option, to order a power feed that is capable of delivering a higher DC power level but to fuse this power feed so as to allow a power level less than the feed's maximum to be drawn by DTM. AT&T is not required to build its central office power infrastructure to meet DTM's forecasted DC power demand. DTM must specify on its Initial or Subsequent Application the power level it wishes to be able to draw from AT&T's power plant for each existing collocation arrangement DTM converts to the FL Option or for any new collocation arrangements DTM establishes under the FL Option.

AT&T, at any time and at its own expense, shall have the right to verify the accuracy of DTM's power usage under the FL Option for a specific collocation arrangement in a particular AT&T Premises, based on a meter reading(s) taken by AT&T of the amount of power being consumed by DTM's collocation arrangement. AT&T may perform its own meter reading(s) via any method it

Version: 2Q07 Standard ICA

chooses, such as, but not limited to, a clamp-on ammeter. If the meter reading(s) varies by more than ten percent (10%) or five (5) amps from the power usage that has been requested by DTM for the collocation arrangement, under the FL Option, the Parties agree to work cooperatively to reconcile such discrepancy and establish the appropriate usage figure in a reasonable and expeditious manner. If the Parties substantiate AT&T's reading, then AT&T shall adjust DTM's billing to reflect AT&T's power reading beginning with the first day of the month immediately following the date of the last metered reading taken by AT&T.

- 8.9.9.3 AT&T shall assess DTM a monthly recurring charge for DC power under the FL Option, as set forth in Exhibit B. DTM shall notify AT&T of any change in its DC power usage by submitting a Subsequent Application, which reflects the new DC power level desired by DTM. The requested change in DC power usage will be reflected in DTM's next scheduled monthly billing cycle.
- 8.9.10 Tennessee Caged Collocation Power Usage Metering Option. In Central Offices in Tennessee only, DTM may request that DC power provisioned by AT&T to DTM's caged Collocation Space be assessed pursuant to the orders entered by the Tennessee Regulatory Authority in Dockets 97-01262, 99-00430, and 00-00544 for Collocation for Tennessee. By electing the TRA Option, DTM accepts the TRA rates, terms and conditions of Exhibit C in their entirety in conjunction with the other terms and conditions of Attachment 4.
- 8.9.11 Georgia Caged Collocation Power Usage Metering Option. In Georgia, DTM may request that DC power provisioned by AT&T to DTM's Collocation Space be assessed pursuant to Georgia Public Service Commission Order Docket No. 14361-U ("Order"). AT&T will assess DTM for -48V DC power using the actual number of load Amps measured. The power circuits may be fed from either an AT&T BDFB or DTM's BDFB. These recurring power charges will be assessed by AT&T on the Space Acceptance Date or Space Ready Date, whichever is appropriate, pursuant to Section 8.3.
- 8.9.11.1 Upon DTM's election of the power metering option DTM will convert existing caged collocation arrangements to the power metering rate structure. The recurring power charges that are contained Exhibit B of this Attachment will be assessed on the Space Ready Date associated with the Subsequent Application submitted by DTM to convert an existing caged collocation arrangement to the metered power rates.
- 8.9.11.2 Pursuant to the Order, DTM shall provide a Fluke Model 189 AC/DC multimeter and Fluke Model i410 clamp-on ammeter probe for each central office where they have requested metered power. One copy of the FlukeView software must also be provided for each Fluke 189 multimeter, and each copy must comply with Fluke copyrights.
- 8.9.11.3 DTM may, at its sole cost and expense, install its own meters on its BDFB(s) located in its own caged Collocation Space(s) and notify AT&T of the option of using such meters for the purposes of measuring DTM's actual power usage. In

Version: 2Q07 Standard ICA

such case, AT&T, or its AT&T Certified Supplier, will have the option of reading and recording the actual power usage from either the meter installed on DTM's own BDFB(s) or via the aforementioned Fluke 189 multimeter equipped with a Fluke i410 clamp-on ammeter probe.

- 8.9.11.4 AT&T, at its sole option and at its own cost, may choose to purchase, install, and use its own ammeter measurement device. The usage reading for the option elected by AT&T shall be used for purposes of calculating the DC power usage billing.
- 8.9.11.5 AT&T, or its AT&T Certified Supplier, will perform all metering activities, to measure the actual power usage being drawn by DTM's collocation equipment on both the A and B power feeds. The charge will be the sum of both the A and B power feeds and will be based upon either an instantaneous reading or busy hour average current reading, depending on the capabilities of the ammeter measurement device.
- 8.9.11.6 If AT&T, or its AT&T Certified Supplier, requires access to DTM's caged Collocation Space(s) for purposes of measuring the power usage, AT&T or its AT&T Certified Supplier shall provide DTM with a minimum of forty-eight (48) hours (two business days) notice that access is required. DTM shall respond to such request for access within twenty-four (24) hours for the purpose of establishing the date and time of access to DTM's caged Collocation Space(s). Once the date and time of access to DTM's caged Collocation Space(s) has been agreed upon, DTM and AT&T, or its AT&T Certified Supplier, shall adhere to the agreed upon date and time, or provide a minimum of three (3) hours notice to the other Party if the original appointment(s) will be missed or must be canceled and rescheduled. Once a mutually agreed upon date and time are established and DTM does not provide minimum of three (3) hours notice, AT&T's Certified Supplier will only remain at the site for thirty (30) minutes. After thirty (30) minutes the appointment will be considered missed by DTM.
- 8.9.11.7 If DTM fails to provide access to its caged Collocation Space(s) or fails to provide AT&T, or its AT&T Certified Supplier, with sufficient notification of the missed appointment(s), as noted above, then DTM shall pay the nonrecurring "Additional Meter Reading Trip Charge", as set forth in Exhibit B of this Attachment, for each additional meter reading trip that must be rescheduled to measure DTM's power usage for such caged Collocation Space(s). DTM and the AT&T Certified Supplier may jointly agree to less stringent notification requirements to address, for example, any service interruption or restoration of service situations, on a location-by-location basis.
- 8.9.11.8 For each new caged collocation arrangement, DTM shall indicate on DTM's Initial Application that they are electing to have metered power. For each location that DTM wishes to convert to metered power DTM will submit a Subsequent Application and agrees to include in the Comments section of the Subsequent Application the following comment:

Version: 2Q07 Standard ICA

This Subsequent Application is DTM's certification that DTM is opting to convert this caged collocation arrangement to metered power and will permit AT&T, or the AT&T Certified Supplier, to measure its actual power usage on all power feeds.

- 8.9.11.9 AT&T will bill DTM a Power Reconfiguration Only Application Fee, as set forth in Exhibit B of this Attachment, on the date that AT&T provides an Application Response to each Subsequent Application submitted by DTM converting its caged collocation arrangements to the metered power rates. AT&T shall then arrange for the measurement of DTM's actual power usage on each power feed (each A and B power feed) once each quarter at each of DTM's caged collocation arrangements for which DTM has submitted an Initial or Subsequent Application electing metered power.
- 8.9.11.10 Based upon the actual power usage measurement taken by AT&T or the AT&T Certified Supplier, AT&T shall assess DTM for power usage for the following quarter based upon DTM's actual metered usage for each power feed (both the A and B power feeds) or a minimum of ten (10) amps of –48V DC power usage for the sum of the A and B feeds for each power cable, whichever is greater. Such usage shall then be multiplied by the rate for Load Amps either with an AT&T BDFB or with DTM BDFB as set forth in Exhibit B of this Attachment, to determine the appropriate monthly recurring power usage charge that will be billed to DTM for the following three (3) months or until the next power usage measurement is taken, whichever is later.
- 8.9.11.11 Either Party, within fifteen (15) days of notice of the usage measurement established by the scheduled meter reading, may challenge the accuracy of that reading by requesting a new reading. If DTM requests that an unscheduled (prior to the next scheduled quarterly power reading date) power usage reading be taken, then DTM will be responsible for paying the "Additional Meter Reading Trip Charge" contained in Exhibit B of this Attachment. If AT&T requests a power usage reading be taken in this instance, then DTM will not be charged the "Additional Meter Reading Trip Charge" for the unscheduled meter reading. If the readings vary by more than ten (10) % or five (5) Amps, whichever is greater, the Parties shall work cooperatively to reconcile such discrepancies and establish the appropriate usage figure in a reasonable and expeditious manner. If the readings do not vary outside these ranges, the initial reading will be used to calculate DTM's AC usage charge for the next three (3) months.
- 8.9.11.12 AT&T, at any time and at its own expense, shall have the right to verify the accuracy of DTM's BDFB meter by performing its own meter reading via an alternate method, such as, but not limited to, an ammeter. If the meter readings vary by more than ten (10) % or five (5) Amps, whichever is greater, the Parties agree to perform a joint investigation. If DTM's BDFB meter is found to be in error, then DTM agrees to recalibrate, repair, or replace its meter as required. The Parties recognize that the meter readings discussed in this Attachment are

Version: 2Q07 Standard ICA

instantaneous readings that can experience minor fluctuations due to usage traffic, voltage fluctuations, and calibration of the meters themselves. The readings must vary by more than ten (10) % or five (5) Amps, whichever is greater, before any recalibration, repair, or replacement will be required. If the AT&T reading is substantiated, AT&T shall adjust DTM's billing retroactive to the beginning of the quarter for which the last meter reading was taken.

- When DTM submits the appropriate Initial or Subsequent Application for a specific caged collocation arrangement in a particular AT&T Premises, AT&T will provide the associated Application Response pursuant to Section 6 above. It will then be the responsibility of DTM to submit a BFFO. After AT&T receives the BFFO from DTM, the Initial or Subsequent Application will be completed by AT&T within the provisioning intervals contained in Section 7 above and DTM will be notified of the Space Ready Date or when the appropriate record and database changes have been made by AT&T to reflect DTM's conversion to the metered power rates (which will be considered the "Space Ready Date" for purposes of a Subsequent Application submitted to convert a specific caged collocation arrangement in a particular AT&T Premises to the metered power rates).
- 8.9.11.14 AT&T will not permit DTM to elect an earlier Space Acceptance Date than the Space Ready Date for any request submitted via a Subsequent Application for an existing caged collocation arrangement. When a Subsequent Application is used to elect metered power and there are no other changes requested, billing for the recurring charges associated with metered power will begin upon the Space Ready Date. If DTM occupies the space prior to the Space Ready Date, for Initial Application requests only, the date DTM occupies the space will be deemed the new Space Acceptance Date and billing for metered power will begin on that date. When DTM moves to metered power the number of fused amps of DC Power requested by DTM on its Initial or Subsequent Application will be used for calculating the number of amps to be billed until such time as AT&T or its AT&T Certified Supplier can perform, under the currently existing quarterly meter reading schedule, a reading of DTM's power usage for the requested caged Collocation Space. As soon as this reading has been taken, AT&T will adjust DTM's billing accordingly to reflect the actual metered usage back to the Space Acceptance Date. AT&T will also use this reading for billing purposes until the next quarterly meter reading is performed by AT&T or its AT&T Certified Supplier.
- 8.9.11.15 DTM agrees to submit a Subsequent Application to notify AT&T when DTM has removed or installed telecommunications equipment in DTM's physical Collocation Space to ensure that DTM's existing fused DC power capacity is sufficiently engineered to accommodate the power requirements associated with the installation of additional equipment in DTM's Collocation Space. An associated change in power usage will be reflected in the next quarterly power measurement billing cycle.

Version: 2Q07 Standard ICA

- 8.9.11.16 AT&T will bill DTM a monthly recurring charge per caged Collocation Space for each arrangement that DTM has converted to metered power or for new caged Collocation Spaces under the election of metered power. This "Meter Reading" monthly recurring rate element will be assessed per circuit for each circuit read by AT&T or its AT&T Certified Supplier, at the rates set forth in Exhibit B.
- 8.9.12 In Alabama and Louisiana, DTM has the option to purchase power directly from an electric utility company. Under such option, DTM is responsible for contracting with the electric utility company for its own power feed and meter and is financially responsible for purchasing all equipment necessary to accomplish the arrangement, including inverters, batteries, power boards, bus bars, BDFBs, backup power supplies and cabling. The actual work to install this arrangement must be performed by an AT&T Certified Supplier hired by DTM. DTM's AT&T Certified Supplier must comply with all applicable safety codes, including the NEC and National Electric Safety Code (NESC) standards, in the installation of this power arrangement. If DTM currently has power supplied by AT&T. DTM may request to change its Collocation Space to obtain power from an electric utility company by submitting a Subsequent Application. AT&T will waive the application fee for this Subsequent Application if no other changes are requested therein. Any floor space, cable racking, etc., utilized by DTM in provisioning said power will be billed by AT&T on an ICB basis.
- 8.9.13 In South Carolina, DTM has the option to purchase power directly from an electric utility company where technically feasible and where space is available in a requested AT&T Premises. Under such option, DTM is responsible for contracting with the electric utility company for its own power feed and meter, and is financially responsible for purchasing all equipment necessary to accomplish the conversion of the commercial AC power to DC power, including inverters, batteries, power boards, bus bars, BDFBs, backup power supplies and power cabling. The actual work to install this arrangement must be performed by an AT&T Certified Supplier hired by DTM. DTM's AT&T Certified Supplier must comply with all applicable national, regional, state and local safety, electrical, fire and building codes, including the NESC standards, in the installing of this power arrangement, just as AT&T is required to comply with these codes. DTM must submit an application to AT&T for the appropriate amount of Collocation Space that DTM requires in order to install this type of power arrangement. AT&T will evaluate the request and determine if the appropriate amount of space is available within the AT&T Premises for the installation of DTM's power equipment and facilities. This type of power arrangement must be located in an appropriate area in the AT&T Premises that has been properly conditioned for the installation of power equipment and conforms to the applicable national, regional, state and local safety, electrical, fire and building codes. AT&T shall waive the application fee or any other nonrecurring charge that would otherwise be due from a CLEC that decides to reconfigure an existing collocation power arrangement so as to purchase power directly from an electric utility company as provided herein. DTM shall be responsible for the recurring

Version: 2Q07 Standard ICA

charges associated with the additional space needed in the AT&T Premises for this type of power arrangement, including space required to place associated power-related equipment and facilities (i.e., batteries, generator, fuse panel, power meter, etc.). If there is no space available for this type of power arrangement in the requested AT&T Premises, AT&T may seek a waiver of these requirements from the Commission for the AT&T Premises requested. DTM would have the option to order its power needs directly from AT&T.

- 8.10 <u>Central Office Cable Installation.</u> Cable Installation fees will be assessed on a per entrance cable basis. This nonrecurring charge will be billed by AT&T upon receipt of DTM's BFFO. Charges for cable racking, cable support structure and entrance fiber structure are recurring fees and will also be assessed according to the rates set forth in Exhibit B.
- 8.11 Central Office Cable Records. Cable Records charges apply for work activities required to build or remove existing cable records assigned to DTM in AT&T's database systems. The VG/DS0 per cable record charge is for a maximum of thirty-six hundred (3,600) records per request. The fiber cable record charge is for a maximum of ninety-nine (99) records per request. Cable Record fees will be assessed as a nonrecurring charge, upon receipt of DTM's BFFO, in all AT&T states, except Louisiana. In Louisiana, Cable Record fees will be assessed on a monthly recurring charge basis, upon receipt of DTM's BFFO. All charges will be assessed the rates set forth in Exhibit B.
- 8.12 <u>Security Escort.</u> After DTM has used its one (1) accompanied site visit, pursuant to Section 5.12.1 above, and prior to DTM's completion of the AT&T Security Training requirements, contained in Section 12 below, a security escort will be required when DTM's employees, approved agent, supplier, or Guest(s) desire access to the entrance manhole or an AT&T Premises. The rates for security escort service are assessed pursuant to the fee schedule contained in Exhibit B, beginning with the scheduled escort time agreed to by the Parties. AT&T will wait for one-half (1/2) hour after the scheduled escort time to provide such requested escort service and DTM shall pay for such half-hour charges in the event DTM's employees, approved agent, supplier or Guest(s) fails to show up for the scheduled escort appointment.
- 8.13 Other. If no collocation rate element and associated rate is identified in Exhibit B, the Parties, upon request by either Party, will negotiate the rate for the specific collocation service or function identified in this Attachment.

#### 9 Insurance

- 9.1 DTM shall, at its sole cost and expense, procure, maintain, and keep in force insurance as specified in this Section and underwritten by insurance companies licensed to do business in the states applicable under this Agreement and having a Best's Insurance Rating of A.
- 9.2 DTM shall maintain the following specific coverage:

Version: 2Q07 Standard ICA

- 9.2.1 Commercial General Liability coverage in the amount of ten million dollars (\$10,000,000) or a combination of Commercial General Liability and Excess/Umbrella coverage totaling not less than ten million dollars (\$10,000,000). AT&T shall be named as an Additional Insured on the Commercial General Liability policy as specified herein.
- 9.2.2 Statutory Workers Compensation coverage and Employers Liability coverage in the amount of one hundred thousand dollars (\$100,000) each accident, one hundred thousand dollars (\$100,000) each employee by disease, and five hundred thousand dollars (\$500,000) policy limit by disease.
- 9.2.3 All Risk Property coverage on a full replacement cost basis insuring all of DTM's real and personal property situated on or within an AT&T Premises.
- 9.2.4 DTM may elect to purchase business interruption and contingent business interruption insurance, having been advised that AT&T assumes no liability for loss of profit or revenues should an interruption of service occur.
- 9.3 The limits set forth in Section 9.2 above may be increased by AT&T from time to time during the term of this Agreement, upon thirty (30) days notice to DTM, to at least such minimum limits as shall then be customary with respect to comparable occupancy of AT&T structures.
- All policies purchased by DTM shall be deemed to be primary and not contributing to or in excess of any similar coverage purchased by AT&T. All insurance must be in effect on or before the date equipment is delivered to AT&T's Premises and shall remain in effect for the term of this Agreement or until all of DTM's property has been removed from AT&T's Premises, whichever period is longer. If DTM fails to maintain required coverage, AT&T may pay the premiums thereon and seek reimbursement of same from DTM.
- 9.5 DTM shall submit certificates of insurance reflecting the coverage required pursuant to this Section within a minimum of ten (10) business days prior to the commencement of any work in the Collocation Space. Failure to meet this interval may result in construction and equipment installation delays. DTM shall arrange for AT&T to receive thirty (30) business days' advance notice of cancellation or non-renewal from DTM's insurance company. DTM shall forward a certificate of insurance and notice of cancellation/non-renewal to AT&T at the following address:

AT&T

Attn: Risk Management Office – Finance 17F54 AT&T Midtown Center 675 W. Peachtree Street Atlanta, GA 30375

9.6 DTM must conform to recommendations made by AT&T's fire insurance company to the extent AT&T has agreed to, or shall hereafter agree to, such

Version: 2Q07 Standard ICA

recommendations.

- 9.7 <u>Self Insurance.</u> If DTM's net worth exceeds five hundred million dollars (\$500,000,000), DTM may elect to request self-insurance status in lieu of obtaining any of the insurance required in Section 9.2 above. DTM shall provide audited financial statements to AT&T thirty (30) days prior to the commencement of any work in the Collocation Space. AT&T shall then review such audited financial statements and respond in writing to DTM in the event that self-insurance status is not granted to DTM. If AT&T approves DTM for self-insurance, DTM shall annually furnish to AT&T, and keep current, evidence of such net worth that is attested to by one of DTM's corporate officers. The ability to self-insure shall continue so long as DTM meets all of the requirements of this Section. If DTM subsequently no longer satisfies the requirements of this Section, DTM is required to purchase insurance as indicated by Section 9.2 above.
- 9.8 The net worth requirements set forth in Section 9.7 above may be increased by AT&T from time to time during the term of this Agreement upon thirty (30) days' notice to DTM to at least such minimum limits as shall then be customary with respect to comparable occupancy of an AT&T Premises.
- 9.9 Failure to comply with the provisions of this Section will be deemed a material breach of this Attachment.

#### 10 Mechanics Lien

10.1 If any mechanics lien or other liens are filed against property of either Party (AT&T or DTM), or any improvement thereon by reason of or arising out of any labor or materials furnished or alleged to have been furnished or to be furnished to or for the other Party or by reason of any changes, or additions to said property made at the request or under the direction of the other Party, the other Party directing or requesting those changes shall, within thirty (30) business days after receipt of written notice from the Party against whose property said lien has been filed, either pay such lien or cause the same to be bonded off the affected property in the manner provided by law. The Party causing said lien to be placed against the property of the other shall also defend at its sole cost and expense, on behalf of the other, any action, suit or proceeding which may be brought for the enforcement of such liens and shall pay any damage and discharge any judgment entered thereon.

#### 11 Inspections

11.1 AT&T may conduct an inspection of DTM's equipment and facilities in DTM's Collocation Space(s) prior to the activation of facilities and/or services between DTM's equipment and equipment of AT&T. AT&T may conduct an inspection if DTM adds equipment and may otherwise conduct routine inspections at reasonable intervals mutually agreed upon by the Parties. AT&T shall provide DTM with a minimum of forty-eight (48) hours or two (2) business days, whichever is greater, advance notice of all such inspections. All costs of such

Version: 2Q07 Standard ICA

inspections shall be borne by AT&T.

# 12 Security and Safety Requirements

- Unless otherwise specified, DTM will be required, at its own expense, to conduct a statewide investigation of criminal history records for each DTM employee hired in the past five (5) years being considered for work on an AT&T Premises, for the states/counties where the DTM employee has worked and lived for the past five (5) years. Where state law does not permit statewide collection or reporting, an investigation of the applicable counties is acceptable. DTM shall not be required to perform this investigation if an affiliated company of DTM has performed an investigation of the DTM employee seeking access, if such investigation meets the criteria set forth above. This requirement will not apply if DTM has performed a pre-employment statewide investigation of criminal history records of the DTM employee for the states/counties where the DTM employee has worked and lived for the past five (5) years or, where state law does not permit a statewide investigation, an investigation of the applicable counties.
- DTM will be required to administer to its personnel assigned to the AT&T Premises security training either provided by AT&T, or meeting criteria defined by AT&T at AT&T's Interconnection Web site, www.interconnection.bellsouth.com/guides.
- DTM shall provide its employees and agents with picture identification, which must be worn and visible at all times while in DTM's Collocation Space or other areas in or around the AT&T Premises. The photo identification card shall bear, at a minimum, the employee's name and photo and DTM's name. AT&T reserves the right to remove from an AT&T Premises any employee of DTM not possessing identification issued by DTM or who has violated any of AT&T's policies as outlined in the CLEC Security Training documents. DTM shall hold AT&T harmless for any damages resulting from such removal of DTM's personnel from an AT&T Premises. DTM shall be solely responsible for ensuring that any Guest(s) of DTM is in compliance with all subsections of this Section.
- DTM shall not assign to the AT&T Premises any personnel with records of felony criminal convictions. DTM shall not assign to the AT&T Premises any personnel with records of misdemeanor convictions, except for misdemeanor traffic violations, without advising AT&T of the nature and gravity of the offense(s). AT&T reserves the right to refuse building access to any of DTM's personnel who have been identified to have misdemeanor criminal convictions. Notwithstanding the foregoing, in the event DTM chooses not to advise AT&T of the nature and gravity of any misdemeanor conviction, DTM may, in the alternative, certify to AT&T that it shall not assign to the AT&T Premises any personnel with records of misdemeanor convictions (other than misdemeanor traffic violations).
- 12.4.1 DTM shall not knowingly assign to the AT&T Premises any individual who was a former employee of AT&T and whose employment with AT&T was terminated

Version: 2Q07 Standard ICA

for a criminal offense, whether or not AT&T sought prosecution of the individual for the criminal offense.

- DTM shall not knowingly assign to the AT&T Premises any individual who was a former supplier of AT&T and whose access to an AT&T Premises was revoked due to the commission of a criminal offense, whether or not AT&T sought prosecution of the individual for the criminal offense.
- For each DTM employee or agent hired by DTM within the last five (5) years, who requires access to an AT&T Premises to perform work in DTM Collocation Space(s), DTM shall furnish AT&T certification that the aforementioned background check and security training were completed. This certification must be provided to and approved by AT&T before an employee or agent will be granted such access to an AT&T Premises. The certification will contain a statement that no felony convictions were found and certify that the employee completed the security training. If the employee's criminal history includes misdemeanor convictions, DTM will disclose the nature of the convictions to AT&T at that time. In the alternative, DTM may certify to AT&T that it shall not assign to the AT&T Premises any personnel with records of misdemeanor convictions, other than misdemeanor traffic violations.
- For all other DTM employees requiring access to an AT&T Premises pursuant to this Attachment, DTM shall furnish AT&T, prior to an employee gaining such access, a certification that the employee is not subject to the requirements of Section 12.5 above and that security training was completed by the employee.
- At AT&T's request, DTM shall promptly remove from the AT&T Premises any employee of DTM that AT&T does not wish to grant access to an AT&T Premises: 1) pursuant to any investigation conducted by AT&T, or 2) prior to the initiation of an investigation if an employee of DTM is found interfering with the property or personnel of AT&T or another collocated telecommunications carrier, provided that an investigation shall be promptly commenced by AT&T.
- Security Violations. AT&T reserves the right to interview DTM's employees, agents, suppliers, or Guests in the event of wrongdoing in or around an AT&T Premises or involving AT&T's or another collocated telecommunications carrier's property or personnel, provided that AT&T shall provide reasonable notice to DTM's Security representative of such interview. DTM and its employees, agents, suppliers, or Guests shall reasonably cooperate with AT&T's investigation into allegations of wrongdoing or criminal conduct committed by, witnessed by, or involving DTM's employees, agents, suppliers, or Guests. Additionally, AT&T reserves the right to bill DTM for all reasonable costs associated with investigations involving its employees, agents, suppliers, or Guests if it is established and mutually agreed in good faith that DTM's employees, agents, suppliers, or Guests are responsible for the alleged act(s). AT&T shall bill DTM for AT&T property, which is stolen or damaged, where an investigation determines the culpability of DTM's employees, agents, suppliers,

Version: 2Q07 Standard ICA

or Guests and where DTM agrees, in good faith, with the results of such investigation. DTM shall notify AT&T in writing immediately in the event that DTM discovers one of its employees, agents, suppliers, or Guests already working on the AT&T Premises is a possible security risk. Upon request of the other Party, the Party who is the employer shall discipline consistent with its employment practices, up to and including removal from AT&T's Premises, any employee found to have violated the security and safety requirements of this Section. DTM shall hold AT&T harmless for any damages resulting from such removal of DTM's personnel from an AT&T Premises.

- 12.8 <u>Use of Supplies.</u> Unauthorized use of equipment, supplies or other property by either Party, whether or not used routinely to provide telephone service will be strictly prohibited and handled appropriately. Costs associated with such unauthorized use may be charged to the offending Party, as may be all associated investigative costs.
- 12.9 <u>Use of Official Lines.</u> Except for non-toll calls necessary in the performance of their work, neither Party shall use the telephone(s) of the other Party on AT&T's Premises. Charges for unauthorized telephone calls may be charged to the offending Party, as may be all associated investigative costs.
- 12.10 <u>Accountability.</u> Full compliance with the Security requirements of this Section shall in no way limit the accountability of either Party to the other for the improper actions of its employees, agents, suppliers, or Guests.

### 13 Destruction of Collocation Space

13.1 In the event a Collocation Space is wholly or partially damaged by fire, windstorm, hurricane, tornado, flood or by similar force majeure circumstances to such an extent as to be rendered wholly unsuitable for DTM's permitted use hereunder, then either Party may elect within ten (10) days after such damage, to terminate occupancy of the damaged Collocation Space, and if either Party shall so elect, by giving the other written notice of termination, both Parties shall stand released of and from further liability under the terms hereof. If the Collocation Space shall suffer only minor damage and shall not be rendered wholly unsuitable for DTM's permitted use, or is damaged and the option to terminate is not exercised by either Party, AT&T covenants and agrees to proceed promptly without expense to DTM, except for improvements not to the property of AT&T, to repair the damage. AT&T shall have a reasonable time within which to rebuild or make any repairs, and such rebuilding and repairing shall be subject to delays caused by storms, shortages of labor and materials, government regulations, strikes, walkouts, and causes beyond the control of AT&T, which causes shall not be construed as limiting factors, but as exemplary only. DTM may, at its own expense, accelerate the rebuild of its Collocation Space and equipment provided, however, that an AT&T Certified Supplier is used and the necessary space preparation has been completed. If DTM's acceleration of the project increases the cost of the project, then those additional charges will be incurred at DTM's

Version: 2Q07 Standard ICA

expense. Where allowed and where practical, DTM may erect a temporary facility while AT&T rebuilds or makes repairs. In all cases where the Collocation Space shall be rebuilt or repaired, DTM shall be entitled to an equitable abatement of rent and other charges, depending upon the unsuitability of the Collocation Space for DTM's permitted use, until such Collocation Space is fully repaired and restored and DTM's equipment installed therein (but in no event later than thirty (30) days after the Collocation Space is fully repaired and restored). Where DTM has placed an Adjacent Arrangement pursuant to Section 3.4 above, DTM shall have the sole responsibility to repair or replace said Adjacent Arrangement provided herein. Pursuant to this Section, AT&T will restore the associated services to the Adjacent Arrangement.

#### **Eminent Domain**

14.1 If the whole of a Collocation Space or Adjacent Arrangement shall be taken by any public authority under the power of eminent domain, then this Attachment shall terminate with respect to such Collocation Space or Adjacent Arrangement as of the date possession shall be taken by such public authority and rent and other charges for the Collocation Space or Adjacent Arrangement shall be paid up to that day with a proportionate refund by AT&T of such rent and charges as may have been paid in advance for a period subsequent to the date of the taking. If any part of the Collocation Space or Adjacent Arrangement shall be taken under eminent domain, AT&T and DTM shall each have the right to terminate this Attachment with respect to such Collocation Space or Adjacent Arrangement and declare the same null and void, by written notice of such intention to the other Party within ten (10) days after such taking.

### 15 Nonexclusivity

DTM understands that this Attachment is not exclusive and that AT&T may enter into similar agreements with other Parties. Assignment of Collocation Space pursuant to all such agreements shall be determined by space availability and made on a first come, first serve basis.

Version: 2Q07 Standard ICA

#### ENVIRONMENTAL AND SAFETY PRINCIPLES

The following principles provide basic guidance on environmental and safety issues when applying for and establishing physical collocation arrangements.

# 1. General Principles

- 1.1 Compliance with Applicable Law. AT&T and DTM agree to comply with applicable federal, state, and local environmental and safety laws and regulations including U.S. Environmental Protection Agency (USEPA) regulations issued under the Clean Air Act (CAA), Clean Water Act (CWA), Resource Conservation and Recovery Act (RCRA), Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), Superfund Amendments and Reauthorization Act (SARA), the Toxic Substances Control Act (TSCA), and Occupational Safety and Healthy Act (OSHA) regulations issued under the OSHA of 1970, as amended and National Fire Protection Association (NFPA), NEC and NESC (Applicable Laws) requirements. Each Party shall notify the other if compliance inspections are conducted by regulatory agencies and/or citations are issued that relate to any aspect of this Attachment.
- Notice. AT&T and DTM shall provide notice to the other, including any Material Safety Data Sheets (MSDSs), of known and recognized physical hazards or Hazardous Chemicals existing on site or brought on site. A Hazardous Chemical inventory list is posted on an OSHA Poster and updated annually at each Central Office. This Poster is normally located near the front entrance of the building or in the lounge area. Each Party is required to provide specific notice for known potential Imminent Danger conditions. DTM should contact 1-800-743-6737 for any AT&T MSDS required.
- 1.3 Practices/Procedures. AT&T may make available additional environmental control procedures for DTM to follow when working at an AT&T Premises (See Section 2, below). These practices/procedures will represent the regular work practices required to be followed by the employees and suppliers of AT&T for environmental protection. DTM will require its suppliers, agents, Guests, and others accessing the AT&T Premises to comply with these practices. Section 2 below lists the Environmental categories where AT&T practices should be followed by DTM when operating in the AT&T Premises.
- 1.4 <u>Environmental and Safety Inspections.</u> AT&T reserves the right to inspect the DTM space with proper notification. AT&T reserves the right to stop any DTM work operation that imposes Imminent Danger to the environment, employees or other persons in or around an AT&T Premises.
- 1.5 <u>Hazardous Materials Brought On Site.</u> Any hazardous materials brought into, used, stored or abandoned at an AT&T Premises by DTM are owned by and considered the property of DTM. DTM will indemnify AT&T for claims, lawsuits or damages to persons or property caused by these materials. Without

Version: 2Q07 Standard ICA

prior written AT&T approval, no substantial new safety or environmental hazards can be created by DTM or different hazardous materials used by DTM at an AT&T Premises. DTM must demonstrate adequate emergency response capabilities for the materials used by DTM or remaining at an AT&T Premises.

- 1.6 <u>Spills and Releases.</u> When contamination is discovered at an AT&T Premises, either Party discovering the condition must notify the other Party. All Spills or Releases of regulated materials will immediately be reported by DTM to AT&T.
- 1.7 <u>Coordinated Environmental Plans and Permits.</u> AT&T and DTM will coordinate plans, permits or information required to be submitted to government agencies, such as emergency response plans, spill prevention control and countermeasures (SPCC) plans and community reporting. If fees are associated with filing, AT&T and DTM will develop a cost sharing procedure. If AT&T's permit or EPA identification number must be used, DTM must comply with all of AT&T's permit conditions and environmental processes, including environmental "best management practices (BMP)" (see Section 2, below) and the selection of AT&T disposition vendors and disposal sites.
- Environmental and Safety Indemnification. AT&T and DTM shall indemnify, defend and hold harmless the other Party from and against any claims (including, without limitation, third-party claims for personal injury or death or real or personal property damage), judgments, damages (including direct and indirect damages and punitive damages), penalties, fines, forfeitures, costs, liabilities, interest and losses arising in connection with the violation or alleged violation of any Applicable Law or contractual obligation or the presence or alleged presence of contamination arising out of the acts or omissions of the indemnifying Party, its employees, agents, suppliers, or Guests concerning its operations at an AT&T Premises.

### 2. Categories for Consideration of Environmental Issues

- When performing functions that fall under the following Environmental categories on AT&T's Premises, DTM agrees to comply with the applicable sections of the current issue of AT&T's Environmental and Safety Methods and Procedures (M&Ps), incorporated herein by this reference. DTM further agrees to cooperate with AT&T to ensure that DTM's employees, agents, suppliers and/or Guests are knowledgeable of and satisfy those provisions of AT&T's Environmental M&Ps, which apply to the specific Environmental function being performed by DTM, its employees, agents, suppliers, and/or Guests.
- The most current version of the reference documentation must be requested from DTM's AT&T Regional Contract Manager (RCM).

#### 3. Definitions

<u>Generator.</u> Under RCRA, the person whose act produces a Hazardous Waste, as defined in 40 C.F.R. § 261, or whose act first causes a Hazardous Waste to become subject to regulation. The Generator is legally responsible for the proper management and disposal of Hazardous Wastes in accordance with regulations.

<u>Hazardous Chemical.</u> As defined in the U.S. OSHA hazard communications standard (29 C.F.R. § 1910.1200), any chemical which is a health hazard or physical hazard.

Hazardous Waste. As defined in Section 1004 of RCRA.

<u>Imminent Danger.</u> Any conditions or practices at an AT&T Premises which are such that a danger exists which could reasonably be expected to cause immediate death or serious harm to people or immediate significant damage to the

Version: 2Q07 Standard ICA

environment or natural resources.

Spill or Release. As defined in Section 101 of CERCLA.

# 4. Acronyms

<u>RCM</u> – Regional Collocation Manager (f/k/a Account Team Collocation Coordinator)

BST – BellSouth Telecommunications

<u>CRES</u> – Corporate Real Estate and Services (formerly PS&M)
